

'DMR,

YOUR SAFETY IS OUR PRIORITY

Product Brochure

2026

PRODUCT BROCHURE

DMR is a benchmark in the design and supply of integrated solutions for workplace safety and environmental protection. Inspired by the principles of Lean Manufacturing, we adopt a visual, customized, and efficiency-oriented approach to support companies in creating safer working environments.

We are ready to put our experience at your service and we
hope to welcome you among our partners soon.
Thank you in advance for your trust.

A handwritten signature in black ink that reads "DMR". The letters are fluid and slightly slanted. A horizontal line is drawn underneath the signature.

Since 2008, DMR has been present throughout the national territory, offering a network of sales consultants directly at the service of customers.

DMR

Our MISSION

"Alongside companies, to build safety and well-being"

Our mission is to ensure safety and enhance well-being, driving productivity through prevention, efficiency, and sustainability. We provide expert guidance and tailored solutions to help companies build safer, high-performing workplaces.

Our VISION

"Your trusted partner for safety and innovation"

We strive to be the trusted partner for every company that values safety, providing expert support and innovative solutions where technology, experience, and people unite to create safer, more efficient workplaces.

Our Values

We reduce waste and optimize resources by following Lean principles.

GROWING TOGETHER IN SAFETY

Every action we take is aimed at enhancing the experience of those who choose DMR

Product Quality:

The result of continuous research and the application of Lean Manufacturing, aimed at enhancing safety, improving operator well-being, and optimizing costs.

Innovative Products:

Our catalog is continuously updated with modern, technology-driven solutions designed to enhance workplace safety and meet evolving needs.

Consultancy:

We are your partner in selecting the most suitable project or product, offering on-site inspections and free testing carried out by our technicians.

Order Processing:

We provide full support throughout all pre- and post-sales phases, with constant assistance from our offices.

Customer Service:

Our team, present across Italy and abroad, delivers prompt responses and tailored solutions. We pay special attention to feedback to ensure maximum satisfaction with our products and services.

"In the beginning, my company started in the attic of our home. Young and full of ideas, with limited resources, I found strength in my wife and three children.

That dream of a 33-year-old has today become DMR: a leading company in workplace safety, with 27 employees, a research and development laboratory, a 2,000 m² warehouse, and a commercial network spanning the entire Italian territory."

Marcello De Marco - CEO DMR

SIGNAGE & POSTERS

In this category, we offer solutions designed to organize and secure workplace spaces, clearly defining operational areas and pathways. Our adhesive signage is easy to apply, highly durable, and does not require production interruptions during installation. Unlike traditional painting, it produces no odors and requires no special disposal, offering a clean, fast, and sustainable alternative. Thanks to their high visibility and long-lasting performance, DMR safety decals help prevent accidents and improve workplace efficiency.

All products comply with ASR A1.3 (2013) and DIN EN ISO 7010 standards, ensuring quality and reliability.

ADHESIVE LINE

Our products come in different adhesive and top-layer options, each tailored to specific applications.

Explore the features and differences to find the solution that best fits your needs.

MEAN LEAN

rolls / shapes
for indoor use

- Ideal for adhesive rolls and shapes, but not used for signs
- Best balance between price and quality
- Made with a film that ensures easy cleaning thanks to its glossy finish
- Equipped with a rubber-based adhesive with embedded mesh (rubber adhesive + mesh)

SUPREME

rolls / shapes / signs
for indoor use
pedestrian and forklift traffic

- Customizable multicolor product
- Suitable for indoor use on any type of flooring
- Rubber adhesive (natural rubber with embedded mesh)
- Anti-slip certified
- Embossed finish

NITTO

rolls / shapes / signs
for indoor use
pedestrian and forklift traffic

- Suitable for smooth floors
- Equipped with beveled edges
- Super Nitto adhesive
- Anti-slip embossed finish on signs
- Glossy finish on rolls and shapes

NITTO HEAVY DUTY

rolls / shapes / signs
for indoor use
pedestrian and forklift traffic

- Same surface lamination as the Nitto type
- More durable and high-performance adhesive: 3M adhesive

XTREME

rolls / shapes
for indoor use
forklift traffic

- Designed and made with a surface film that:
 - Ensures extreme durability during forklift rotations (even on surfaces where concrete may be damaged)
 - Allows easy cleaning
 - Features a glossy finish
- Equipped with rubber-based adhesive with embedded mesh
- Beveled edges
- Reusable

DOUBLE-SIDED FOAM TAPE

rolls / shapes
for outdoor use
pedestrian and forklift traffic

- High-performance adhesive designed to last over time
- Resistant to the most demanding conditions
- Thanks to the expanding properties of the foam, it adheres very well even on uneven surfaces, with small bumps or cavities

NEWLEAN

rolls / shapes / signs
for indoor use
pedestrian traffic

- Customizable multicolor product
- Anti-slip embossed surface
- Hot-melt "Edge to Edge" adhesive
- Ensures strong adhesion to workplace floors, minimizing wrinkles and lifting

COLD STORAGE

rolls / shapes
for indoor and outdoor use
pedestrian and forklift traffic

- Suitable for smooth floors
- Solvent-based outdoor adhesive, resistant to low temperatures
- Suitable for refrigerated environments

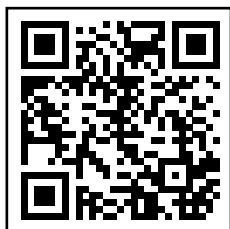

EXTRA STRONG

signs / labels
for indoor and outdoor use
pedestrian and forklift traffic

- Equipped with acrylic adhesive
- Resistant to heavy pedestrian traffic

ADHESIVE ROLLS

9

5S

- SMOOTH SURFACE
- VINYL AND PVC ADHESIVE
- IDEAL FOR NEW FLOORS
- SUITABLE FOR PEDESTRIAN TRAFFIC ONLY

MEAN LEAN

- SMOOTH SURFACE
- AVAILABLE IN ALL RAL COLORS
- RUBBER ADHESIVE WITH MESH
- IDEAL FOR NEW FLOORS
- SUITABLE FOR DUSTY ENVIRONMENTS
- EASY TO CLEAN
- SUITABLE FOR FORKLIFT TRAFFIC
- NOT SUITABLE FOR DRAGGING PALLETS

SUPREME

- EMBOSSED SURFACE
- RUBBER ADHESIVE WITH MESH
- IDEAL FOR NEW, DIRTY, AND UNEVEN FLOORS
- EASY TO CLEAN
- SUITABLE FOR FORKLIFT TRAFFIC
- NOT SUITABLE FOR DRAGGING PALLETS

PERSONALIZE YOUR SUPREME ROLL

The Supreme Roll can be customized with text, logos, images, and colors to perfectly suit the operational needs of your company.

CLEAR COMMUNICATION:

Highlights specific information directly on the floor.

CORPORATE IDENTITY:

Integrates brands and symbols for consistent signage.

VERSATILE APPLICATION:

Suitable for any surface and work area.

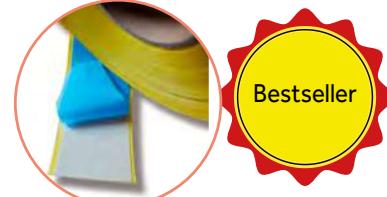

A practical and professional solution for personalized visual safety in company areas dedicated to logistics.

QUICKLY IDENTIFY RISK AREAS

The two-tone Supreme roll is ideal for highlighting hazardous areas, even on unstable floors.

- SIMPLE AND FAST APPLICATION THANKS TO THE ADHESIVE BACKING
- EASY REMOVAL WITH NO RESIDUE
- ZERO MAINTENANCE: NO DRYING TIME OR ADDITIONAL TREATMENTS REQUIRED
- PERFECT FOR ENSURING IMMEDIATE AND LONG-LASTING SAFETY IN WORKPLACES

**VISUAL MANAGEMENT
TAKEN TO THE NEXT LEVEL**

COLD STORAGE

10

- HIGH-RESISTANCE LAMINATED PVC SURFACE
- BEVELED EDGES
- IDEAL FOR COLD ENVIRONMENTS
- SUPREME BASE
- HIGHLY DURABLE OUTDOOR ADHESIVE
- EASY TO CLEAN: IDEAL FOR FOOD INDUSTRIES WITH INTENSIVE USE OF PRESSURE WASHERS
- SUITABLE FOR FORKLIFT TRAFFIC

NITTO

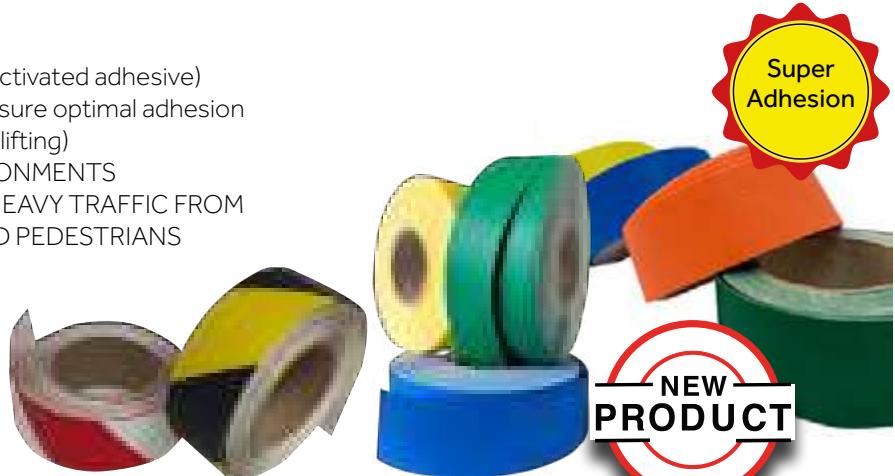

- GLOSSY OR MATTE SURFACE
- RECOMMENDED FOR INDOOR ENVIRONMENTS
- SUITABLE FOR FORKLIFT, PEDESTRIAN, AND PALLET TRUCK TRAFFIC
- POSSIBILITY OF EXTRA-STRONG AND FOAM ADHESIVE
- SUITABLE FOR DRAGGING

XTREME

- SMOOTH SURFACE
- RUBBER ADHESIVE WITH MESH
- RESISTANT TO LOW TEMPERATURES
- IDEAL FOR NEW FLOORS
- IDEAL FOR DUSTY / DIRTY ENVIRONMENTS
- EASY TO CLEAN
- SUITABLE FOR FORKLIFT TRAFFIC
- SUITABLE FOR DRAGGING PALLETS
(test recommended)

→ NEWLEAN

- PVC SURFACE
- HOT-MELT ADHESIVE (thermally activated adhesive)
- EDGE-TO-EDGE ADHESIVE (to ensure optimal adhesion and reduce the risk of wrinkles and lifting)
- IDEAL FOR DUSTY / DIRTY ENVIRONMENTS
- SUITABLE FOR DRAGGING AND HEAVY TRAFFIC FROM FORKLIFTS, PALLET TRUCKS, AND PEDESTRIANS

NEW
PRODUCT

→ OUTDOOR

- ADHESIVE SUITABLE FOR SMOOTH OUTDOOR SURFACES
- REPLACES PAINTING
- REDUCES COSTS AND OPTIMIZES TIME
- EASY TO REMOVE
- THICKNESS 0.85 MM
- TEMPERATURE RESISTANT FROM -40°F (-40°C) TO 212°F (100°C)

11

→ PEDESTRIAN CROSSINGS

Ensure pedestrian safety in areas with moving machinery thanks to our pedestrian crossing rolls: economical, durable, and easy-to-install solutions.

Regulatory compliance: compliant with OSHA standards for pedestrian crossing visibility.

Available types:

SUPREME: high visibility and durability, even on unstable floors.

XTREME: solid color, available on request, ideal for specific applications. Clear and long-lasting safety for pedestrians and operators.

NUMBERS, LETTERS, ARROWS, CORNERS, FOOTPRINTS, SHAPES AND PEDESTRIAN CROSSINGS

Our PVC adhesives are ultra-durable and ideal for communicating safety instructions in industrial and commercial sectors.

Key benefits:

- Suitable for unstable floors
- Quick installation and removal, with no drying or maintenance required
- Optimizes operational costs

Perfect for implementing continuous improvement programs such as 5S, Six Sigma, WCM, OSHA, and TPM, they are available in various shapes, colors, and sizes to meet every operational need.

A practical and reliable solution to enhance safety and efficiency in your workspaces.

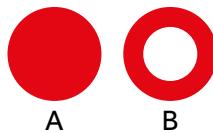

Available grades: Mean Lean (ML), Newlean (L), Supreme (S), Xtreme (X), Outdoor (E), Cold Storage (CS), Nitto (N), Extra-Strong Double-Sided (NX), Foam Double-Sided (NXS)

Available colors: red (R), yellow (Y), white (W), black (B), green (G), blue (BL), orange (O)

12

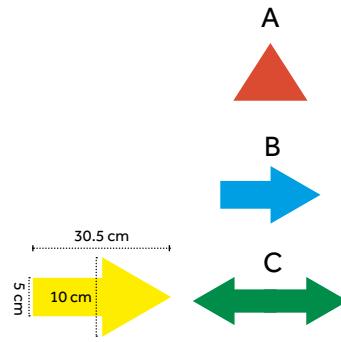

CIRCLES

INDOOR ADHESIVE SIGNAGE

This category includes innovative and reliable solutions for workplace safety, designed to enhance visual communication in work environments. It features high-durability PVC adhesive signs, LED signage with options for audible alerts, and state-of-the-art projectors, ideal for clear and modern signage.

Each product is designed to ensure maximum visibility and to communicate safety rules immediately, helping to create more organized, protected, and efficient workspaces.

Scan the QR code to explore DMR adhesive signage, safety and guidance all in one solution!

Safety decals are essential tools for companies, providing clear guidance and helping to prevent workplace accidents. DMR indoor adhesive signage stands out for high visibility, long-lasting durability, and easy installation, offering significant time and operational cost savings. These products are designed to withstand scraping, traffic, and continuous forklift rotations, ensuring long-lasting performance even in heavily used industrial environments. Additionally, any type of sign can be produced and customized, including photoluminescent models, to meet the specific operational needs of the company.

Choose the product that best suits your needs

Our adhesive signs can be produced with different types of adhesive and top layers, which define their final use and ensure maximum effectiveness in every operational context.

NITTO N: Ideal solution for indoor applications on smooth floors. Designed to withstand pedestrian and forklift traffic, it ensures reliability and long-lasting performance. Beveled edges provide better aesthetics and increased safety, while the Super Nitto adhesive offers high and stable adhesion.

NITTO X: Maintains the same surface lamination as the Nitto N version but features an even more durable and high-performance adhesive. The perfect choice for those requiring superior hold in more demanding operational environments.

NITTO XFS: Featuring the same surface lamination as the Nitto range, this version is specifically designed for rough floors. The extra-strong foam adhesive ensures exceptional adhesion even on the most challenging surfaces.

NEWLEAN: Ideal for indoor environments, NewLean has an anti-slip embossed surface designed for pedestrian traffic and occasional vehicle passage. The hot-melt "Edge to Edge" adhesive, applied from edge to edge, ensures maximum adhesion to workplace floors, reducing the risk of wrinkles and lifting.

SUPREME: Versatile and reliable, Supreme is suitable for any indoor flooring. The rubber-based adhesive with embedded mesh guarantees excellent grip and durability, making it ideal for pedestrian and forklift traffic even in high-activity environments.

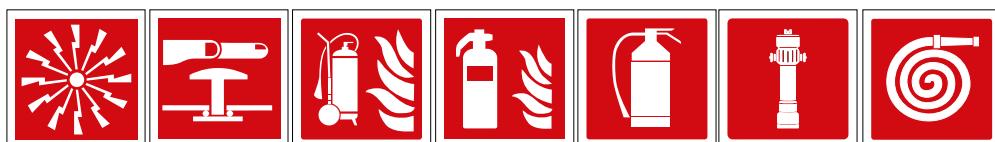

COLD STORAGE: Designed for indoor and outdoor use, it is the ideal solution for smooth floors in low-temperature conditions. The solvent-based outdoor adhesive provides high performance even in cold rooms and refrigerated environments, maintaining excellent forklift traffic resistance.

EXTRA STRONG: Suitable for indoor and outdoor applications, Extra Strong stands for robustness and reliability. The acrylic adhesive ensures excellent hold even under heavy pedestrian traffic, delivering consistent performance over time.

| PRODUCT | INDOOR US | OUTDOOR USE | TRAFFIC | ADHESIVE |
|--------------|-----------|-------------|-----------------------|------------------|
| NITTO N | X | | Pedestrians Forklifts | Super Nitto |
| NITTO-X | X | | Pedestrians Forklifts | High Performance |
| NITTO XFS | X | X | Pedestrians Forklifts | Foam |
| NEWLEAN | X | | Pedestrians Forklifts | Hot Melt |
| SUPREME | X | | Pedestrians Forklifts | Rubber |
| COLD STORAGE | X | X | Pedestrians Forklifts | Outdoor |
| EXTRA STRONG | X | X | Pedestrians | Acrylic |

THE STANDARD SIGNAGE
AVAILABLE IN THE CATALOG
CAN BE CUSTOMIZED
ON REQUEST
WITH ANY DESIGN

STANDARD SIGNS – some examples

CLEANER

Multi-purpose degreasing cleaner, ideal for removing floor signage residues quickly and effectively.

Our Cleaner is an eco-friendly, non-hazardous, and versatile product, designed to effectively remove dirt residues from floors before signage application. This step ensures longer-lasting performance and optimal adhesion of materials, helping to keep workspaces organized and tidy.

DEINK

Solvent-based degreasing cleaner, ideal for removing ink, particulate matter, and residues from sight glasses.

Our solvent-based degreasing cleaner is designed to quickly remove ink, particulate matter, and residues from sight glasses. It is effective against ink stains, markers, stamps, and similar deposits, ensuring fast and thorough cleaning of surfaces.

THE CUSTOMIZED

The Customized category showcases some of the signs created by DMR for its clients, real examples of tailor-made solutions that combine functionality and design. These products represent a key strength of the company, which stands out for its ability to develop signs specifically designed to meet the operational and communication needs of each environment. Each sign can be customized in shape, color, graphics, and content, ensuring unique, integrated results perfectly suited to the workplace for clear, immediate, and professional communication.

CUSTOMIZED ROLLS – some examples

16

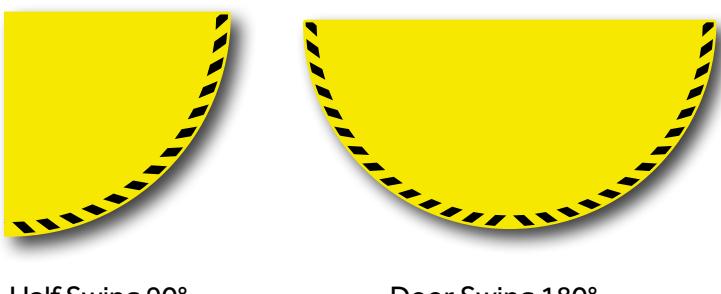

They are a powerful tool for safety, communication, and advertising.
We can produce and customize any color you desire, with the possibility to print text and logos in full color.

DIRECTIONAL SIGNAGE

DOOR SWING ADHESIVE

THE CUSTOMIZED – Tailor-Made Communication

OUTDOOR SIGNAGE

Vertical road signs are signaling devices installed on poles or elevated structures along the roadway, designed to ensure maximum visibility and safety.

Regulated by the Highway Code and the related implementing decrees, they comply with shapes, dimensions, colors, and characteristics established by law. Made from durable materials such as forex, dibond, and aluminum (flat or boxed), these signs ensure long-lasting durability, resistance to weather conditions, and optimal visibility, even in challenging road conditions.

FOREX

Material: Plastic made of expanded or semi-expanded PVC.
Suitable for indoor and outdoor use.
Available thicknesses: 3 / 5 / 10 mm.

- Material used in the visual communication sector
- Ideal for the creation of large-format signs
- Suitable for the production of signage
- Compatible with suspended mounting systems (hooks, cables, etc.)
- Suitable for safety signage
- Available in single-sided or double-sided versions

DIBOND

Composite material consisting of two layers of aluminum enclosing a polyethylene core.
Suitable for indoor and outdoor use.
Available thickness: 3 mm.

- Exceptional lightness and ease of handling
- High mechanical properties and structural strength
- Ideal for high-quality digital printing
- UV-protective surface for long-lasting durability
- Can be mounted using suspended systems (hooks, cables, etc.)

FLAT ALUMINUM

Material: lightweight, durable, and highly versatile metal.
Suitable for indoor and outdoor use.
Available thickness: 1 mm
Anodized 10/10

- Easy to handle and install
- Corrosion-resistant: forms a protective oxide layer against weathering
- Ductile and malleable, easy to work, bend, and shape
- Fully recyclable, helping to reduce environmental impact

BOXED ALUMINUM

Material: lightweight, durable metal.
Available thickness: 2.5 mm
For outdoor use, it must be requested.
Accessories: the pole is also available upon request.

- Lightweight metal: facilitates transport and quick installation
- Retro-reflective film: enhances visibility in low-light conditions
- Certification: compliant with UNI EN 12899 standards
- High-quality digital printing: ensures sharp, precise, and long-lasting images
- UV protection: protective layer preserves the print from ultraviolet rays

VERTICAL SIGNAGE

PHOTOLUMINESCENT SIGNAGE

Photoluminescent signaling products are designed to ensure maximum visibility even in complete darkness or in the presence of smoke, providing immediate and safe orientation in the workplace. This signage allows clear identification of evacuation routes, emergency exits, and mandatory directions, helping to reduce risks during fires, blackouts, or other emergency situations.

Made from durable and high-performance materials, DMR's photoluminescent products ensure long-lasting reliability, high visibility, and compliance with current regulations, offering practical and safe solutions for every business environment.

WHY CHOOSE OUR PHOTOLUMINESCENT PRODUCTS?

- Affordable and high-quality
- Luminescence that meets legal requirements
- Long-lasting: no continuous maintenance required
- Wide range of products
- Custom designs available upon customer request
- All products comply with "REACH" and "RoHS" requirements

DMR GLOW ROLL

The GLOW roll is the ideal solution for marking evacuation routes in case of emergencies or blackouts.

Made with photoluminescent tape, it allows printing of custom messages on a phosphorescent strip, visible even in low-light conditions.

Thanks to the rubber-based adhesive with embedded mesh, the roll ensures long-lasting adhesion even on uneven surfaces, making it particularly durable.

Beveled edges and a non-slip surface ensure compliance with international safety standards, including DIN 67510 Class C, ASTM E2072-04, and ASTM E2030-07, providing an effective and safe product for any environment.

N.B. Customized products are non-returnable

ADHESIVE MARKING

Our range of photoluminescent products for adhesive marking is designed to ensure maximum visibility and safety in any emergency situation.

Ideal for highlighting escape routes, floors, doors, and fire extinguisher stations, these tapes activate in low-light conditions, providing clear and immediate guidance to people and personnel during blackouts or evacuations.

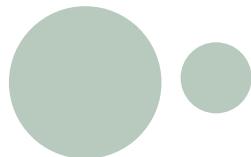

Thanks to their reliability and durability, they offer a practical and safe solution for any industrial or commercial environment.

FOR FLOORS

GREEN DISC WITH ARROW
PHOTOLUMINESCENT ADHESIVE
Available with screw-mount version!

PHOTOLUMINESCENT DISC

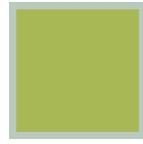

PHOTOLUMINESCENT ARROW

PHOTOLUMINESCENT FOOTPRINTS

PHOTOLUMINESCENT DISC
Maximum compression: 10 tons

PHOTOLUMINESCENT SQUARE
Maximum compression: 16 tons

MATERIAL:
ABS HI 300 Plastic
Marks escape routes in carpeted areas; applying the markers on carpets does not damage them during normal vacuuming or wet cleaning!
The backing materials are made of plastic, and the markers have aluminum bases for flat, cut, or woven carpets upon request.

FOR DOORS

A

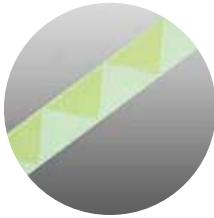

B

SIGN FOR DOOR HANDLE

LOCK OUTLINE + LOCK ADHESIVE

DOOR SIGN ROLL

CONTEXTUAL ADHESIVE (PUSH AND PULL)

SELF-ADHESIVE, NON-WALKABLE,
RESISTANT TO SINGLE-USE APPLICATION.

CAN BE MADE WITH
LAMINATED SURFACE!
Walkable by foot and light vehicles.

► FIRE EXTINGUISHER PLATES

Fire extinguisher base plates are designed to ensure a stable and secure installation of safety devices, such as shut-off valves, ventilation systems, emergency devices, and safety switches. They provide a protective base, ensuring maximum visibility and easy access to the equipment. These products are not suitable for screen printing.

► TAPES AND ROLLS

BLACK SAFETY ROLL

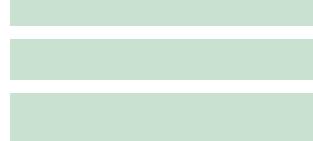

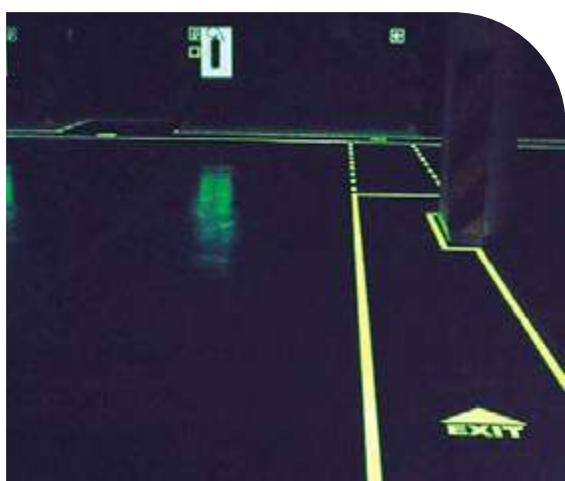

RED SAFETY ROLL

TAPE FOR MARKING/ESCAPE ROUTE INDICATOR

TAPE FOR MARKING/DIRECTION INDICATOR

It is possible to customize the photoluminescent tape with escape route signs!

The stickers are green/transparent in color, self-adhesive, but not photoluminescent.

PHOTOLUMINESCENT SIGNAGE

Photoluminescent signage products provide an essential safety solution, ensuring high visibility even in extreme conditions of total darkness or dense smoke. Designed to make evacuation routes and directions immediately recognizable in the event of fire or blackout, they provide quick and intuitive orientation, protecting people and helping to create safer, more reliable workplaces that comply with safety regulations.

ADVANTAGES:

- COST-EFFECTIVE AND DURABLE: provides excellent long-term performance without high costs
- LOW MAINTENANCE: remains effective with minimal intervention
- EASY INSTALLATION: simple to apply, does not require external power
- RELIABLE IN EMERGENCIES: works perfectly when it is most needed

23

ANGLE SIGNS

Visible from multiple angles, our angled and flag signage is made of aluminum with photoluminescent printing. They can be customized with optional self-adhesive labels, providing a versatile and highly visible solution for any requirement.

LED PANELS AND PROJECTORS FOR SAFETY SIGNAGE

DMR, specializing in the production of signage and LED projectors, offers fully customizable, high-quality solutions, proudly Made in Italy. Our products combine artisanal precision and technological innovation to ensure maximum workplace safety.

Available in single-sided and double-sided versions, suitable for outdoor use, the devices are made of dibond or backlit plexiglass and can be customized in design, fonts, and LED lighting.

With options such as activation via proximity sensor and flashing lights, we provide a complete service from consultation to after-sales support, delivering safe, reliable, and tailor-made solutions.

Scan the QR code and discover how our LED panels can enhance your safety!

All LED panels can be integrated with dedicated control units and sensors, allowing automatic activation under specific conditions.

Hi-Tech MOTION SENSOR CONTROL UNIT

The Hi-Tech Motion Sensor is an intelligent control unit designed to provide maximum flexibility and reliability in managing control and safety systems. Thanks to its multifunction main board, it can handle numerous inputs and outputs, offering great versatility in applications and easily integrating into different operational contexts. Ideal for optimizing protection and improving process efficiency, it ensures consistent performance even in complex and industrial environments. Equipped with a PIR (Passive InfraRed) motion sensor, the control unit allows precise movement monitoring, making it perfect for automatic detection and smart control applications.

HI-TECH RADIO MOTION SENSOR

- The Master and Slave sensors offer an innovative solution to optimize production processes, meeting the flexibility and efficiency requirements typical of Industry 4.0.
- Multi-Voltage Input/Output System: These sensors are designed to operate under various power conditions, ensuring easy integration into existing systems and high versatility in different operational contexts.
- OLED Display: The high-visibility OLED display provides clear real-time data reading, enhancing operator interaction with the system and facilitating timely, informed decisions.
- Compatibility with Electronic Systems: Thanks to compatibility with various electronic protocols, these sensors integrate easily into existing systems, reducing installation time and costs.
- 2.4GHz Wireless Connectivity: Wireless communication at 2.4GHz eliminates the need for complex wiring, making the system scalable and easily expandable according to future needs.

Hi Tech
RADIO MOTION SENSOR

— **SLAVE SENSOR**

The sensor is designed to ensure simple and flexible installation, easily adapting to a variety of operational needs. Its structure allows quick and secure mounting using magnets, eliminating the need to drill or damage metal surfaces, such as industrial shelving, making it particularly suitable for environments where speed and installation flexibility are crucial.

Additionally, it comes with a practical snap-on bracket that also allows wall mounting with screws and anchors. This dual installation option ensures optimal versatility, enabling the sensor to be adapted to the specific requirements of any operational environment.

— **PHOTOCELL SENSOR**

The photocell sensor consists of a transmitter and a receiver integrated into a single unit. The transmitter emits an infrared beam that is reflected by a dedicated reflector and detected by the receiver. When an object interrupts this beam, the sensor no longer receives the reflected signal, and the output immediately indicates the presence of the obstacle.

This system can be connected to our traffic lights, which under normal conditions display green and switch to red as soon as the beam is interrupted, visually signaling the presence of the obstacle.

— **MICROWAVE SENSOR**

The microwave sensor detects the presence of vehicles and pedestrians, helping to improve safety and operational efficiency, although it does not differentiate between them. It is compatible with our Hi-Tech Motion Sensor control unit, enabling integrated management of safety intersections.

When combined with LED signaling panels, this solution provides clear and timely alerts of pedestrian or vehicle movement, such as forklifts, enhancing safety and reducing risks in industrial environments.

25

— **MICROPRO SENSOR**

The Micropro sensor accurately detects the presence of vehicles and pedestrians, enhancing both safety and operational efficiency. It can be installed at a maximum height of 7 meters, covering an area of 5×8 meters, with a more focused detection option of 6×4 meters for fast-approaching vehicles. Equipped with IP67 protection, it is resistant to water and harsh weather conditions, ensuring reliable performance even in outdoor environments. Compatible with the Hi-Tech Motion Sensor control unit and LED signaling panels, it is the ideal solution for monitoring critical intersections and providing timely alerts for pedestrian or vehicle movement.

— **BUZZER**

The buzzer is an essential safety device, designed to emit audible signals that promptly alert to the presence of pedestrians or forklifts in high-risk areas. It integrates easily with our Hi-Tech Motion Sensor control unit and LED panels, providing real-time notifications of pedestrian crossings or forklift movement. Using this system helps reduce the risk of accidents, significantly enhancing safety and ensuring compliance with workplace safety regulations.

— **COLLISION SENTRY**

The Collision Sentry Corner Pro is designed to mitigate risks associated with blind corner intersections, commonly found in industrial environments. These critical points are particularly prone to accidents that can damage equipment and structures, and, most importantly, compromise worker safety. The device detects approaching traffic and alerts to potential hazards through visual and audible alarms, providing timely warnings. Ideal for enhancing workplace safety, the Collision Sentry Corner Pro is especially useful in areas where forklifts and pedestrians share space, significantly reducing the risk of accidents and helping create a safer and more efficient environment.

INDUSTRIAL ELECTRONIC DISPLAY BOARD

The Days Count is an advanced industrial LED display designed to show real-time workplace safety statistics, such as the number of days without accidents. This tool is essential for promoting safety awareness and helping to reduce workplace injuries. The display can be customized with company logos or personalized graphics, making the device not only functional but also aligned with the company's visual identity.

INTELLIGENT LASER CAMERA

The Intelligent Laser Camera is a true game-changer for forklift operations. The device projects a visible line in front of the vehicle, providing precise visual guidance for picking up and placing loads with extreme accuracy.

The system activates automatically via a height sensor and features automatic shutdown after 2 minutes of inactivity to optimize energy consumption. It can be installed using battery power or direct forklift connection.

LASER HEIGHT SENSOR

The height obstacle detection system provides timely warnings to the forklift operator, prompting them to lower the load and/or forks to prevent collisions with beams, suspended loads, or low ceilings.

FREEZE WARNING LED SIGN

The FREEZE WARNING LED SIGN device is now also available in an LED version, equipped with an electronic temperature sensor. This sensor activates the LED panel when the temperature drops below 3°C, causing the panel to flash as long as the temperature remains under this threshold.

Once the temperature rises above 3°C, the flashing stops. Additionally, the panel features an "ICE ALERT" thermal warning system to provide extra safety.

HEAT ALERT LED SIGN

The HEAT ALERT LED SIGN device is equipped with an electronic sensor that activates an LED panel when the temperature exceeds a programmable threshold (for example, 30°C).

The LED flashes as long as the temperature remains above this value and automatically turns off when it drops below the set threshold ($T < 30^\circ\text{C}$), stopping the flashing.

SIGNAL TRAFFIC LIGHTS

LED signal traffic lights are available with one or two lights, in 24V or 230V configurations, designed for use on residential roads, garages, and narrow passages. They come with lenses in red, yellow, or green. The device can be controlled manually via remote controls and switches, or automatically through control units and sensors.

Constructed with an aluminum housing and featuring an IP65 protection rating, it ensures weather resistance and long-lasting durability.

PROJECTED SIGNAGE

Signage is a strategic element for ensuring safety, efficiency, and order in the workplace.

Thanks to DMR projection technology, visual communication reaches a new level: more visible, more durable, and more flexible. In high-wear industrial and logistics environments, where adhesive signage quickly deteriorates or requires frequent maintenance, projected signage offers an innovative, long-lasting, and highly effective solution.

Symbols, pathways, and safety areas are projected directly onto floors or surfaces, without contact and without wear, ensuring constant visibility even in complex environments.

Projection signage can complement or replace traditional signage, providing a dynamic, modern, and easily updatable solution—ideal for intelligent and flexible management of workspaces.

LED LIGHTING PROJECTORS FOR SIGNAGE

DMR Projected Signage

Signage is essential for ensuring safety, efficiency, and organization in corporate spaces.

DMR LED projectors take signage to a new level: more visible, more durable, and more flexible.

Pictogram Projectors

DMR projectors display safety symbols and custom messages, providing clear and versatile signage at all times. Available models: 25W, 40W, 100W, and 320W, adaptable to different lighting conditions and mounting heights.

All models, except the 320W, feature interchangeable optics. The 320W model uses specific optics.

Custom graphics and pictograms are also available for tailor-made signage.

Compact Design and High Performance

DMR LED projectors combine a compact and robust design with versatility and lightweight construction, making them ideal for any work environment, including dusty areas. Exceptional brightness ensures sharp, visible images even in normally lit environments, delivering excellent performance in any corporate facility.

Key Advantages

- Durable and effective solution for high-wear environments
- Clear projection even under normal ambient light
- Compact, robust, lightweight, and versatile design
- Interchangeable optics and complete kit included
- Customizable pictograms for tailor-made signage

DMR 25W

DMR 40W

DMR 100W

DMR 320W

LIGHTING ROUTE 100/200W

Precise and durable light lines

The Lighting Route is designed to create highly defined and consistently visible ground light lines, even in brightly lit environments where traditional signage is less effective.

Its aluminum housing, cold-forged fins, and air-cooling system ensure high durability, long operational life, and continuous operation without risk of overheating.

The high-power LED chip, paired with a two-element linear lens, delivers uniform, sharp, and precise projection along the entire route. Ideal for creating visual pathways in industrial, logistics, exhibition, and public spaces.

Lighting Route provides maximum visibility, long-term reliability, and strong visual impact, enhancing safety and spatial organization.

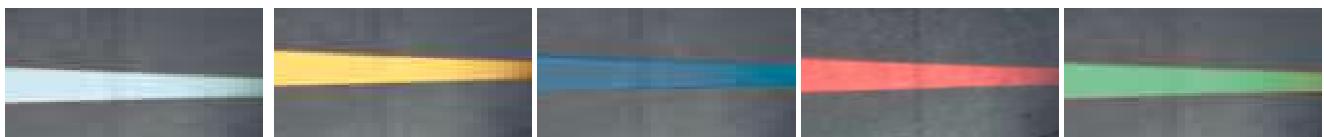

Available in colors:

WHITE / YELLOW / BLUE / RED / GREEN

| OPTICS for 100/200W | PROJECTION RATIO | INSTALLATION HEIGHT | PROJECTION LENGTH |
|---------------------|------------------|---------------------|-------------------|
| Lens from 90° | 1:2 | 4 M | 8 M |
| Lens from 75° | 1:1,5 | 4 M | 6 M |
| Lens from 55° | 1:1 | 4 M | 4 M |

Technical Note: The width of the projected strip does not depend on the projector's lens but varies according to the installation height. The width can range from approximately 7 to 10 cm, depending on the distance of the projector from the projection surface.

N.B. The optics are not interchangeable between the 100W and 200W projector models due to differences in the dimensions of the projector bodies.

GOBOS FOR LED PROJECTORS

The gobo can be customized with any pictogram from our signage catalog or with fully bespoke graphics and text, ensuring maximum creative and design freedom.

Thanks to our expertise, we can develop advanced solutions that coordinate multiple projectors and gobos, creating visually impactful projects that are consistent with the company identity and seamlessly integrated into operational spaces.

Tips for Choosing the Most Suitable Projector and Optics

To get the maximum impact from your gobos, it is essential to consider a few key factors:

Installation Height: Directly affects the sharpness and size of the projected image. Accurate evaluation ensures precise and professional results.

Ambient Brightness: In brightly lit environments, gobo visibility may decrease. In such cases, using more powerful projectors or optics with a lower projection ratio is recommended to achieve clear and well-defined images.

Chosen Pictogram: Complex symbols or those with fine details require higher-quality optics to maintain readability and precision.

Pictogram Size: Image sharpness depends on projection distance and optics choice. At the same time, the desired gobo size, combined with installation height, determines the most suitable optics.

Surface Color and Material: Dark surfaces enhance projection visibility, while light surfaces reflect more ambient light, reducing visual impact. The floor or wall color and material are therefore crucial in selecting the projector power and optimal gobo color.

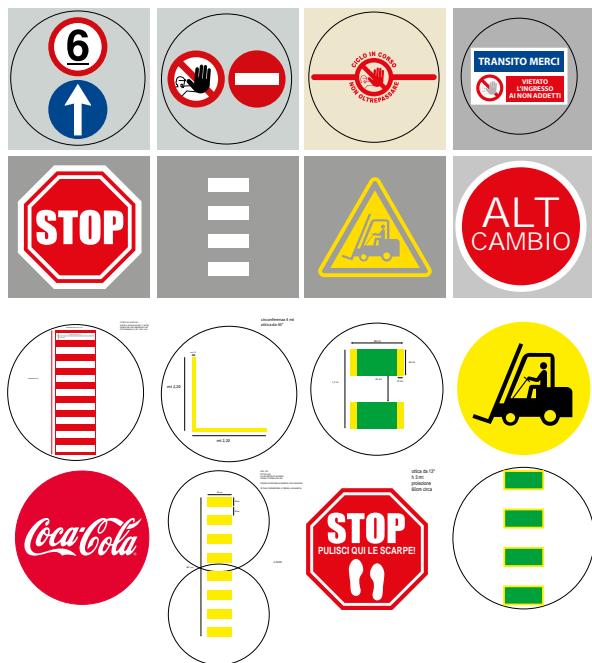

By carefully considering these elements, you can create elegant and functional installations, perfectly integrated into corporate spaces, and effectively showcasing your brand.

| OPTICS 25W/40W/100W | PROJECTION RATIO | INSTALLATION HEIGHT | PROJECTION DIAMETER |
|------------------------|---------------------|------------------------|------------------------|
| Lens from 9° | 1:0,12 | 4 M | 48 CM |
| Lens from 13° | 1:0,2 | 4 M | 80 CM |
| Lens from 20° | 1:0,35 | 4 M | 140 CM |
| Lens from 30° | 1:0,5 | 4 M | 200 CM |
| Lens from 45° | 1:1 | 4 M | 400 CM |
| Lens from 60° | 1:1,5 | 4 M | 600 CM |

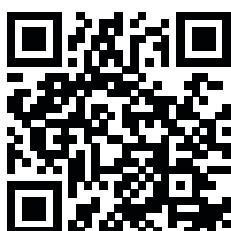

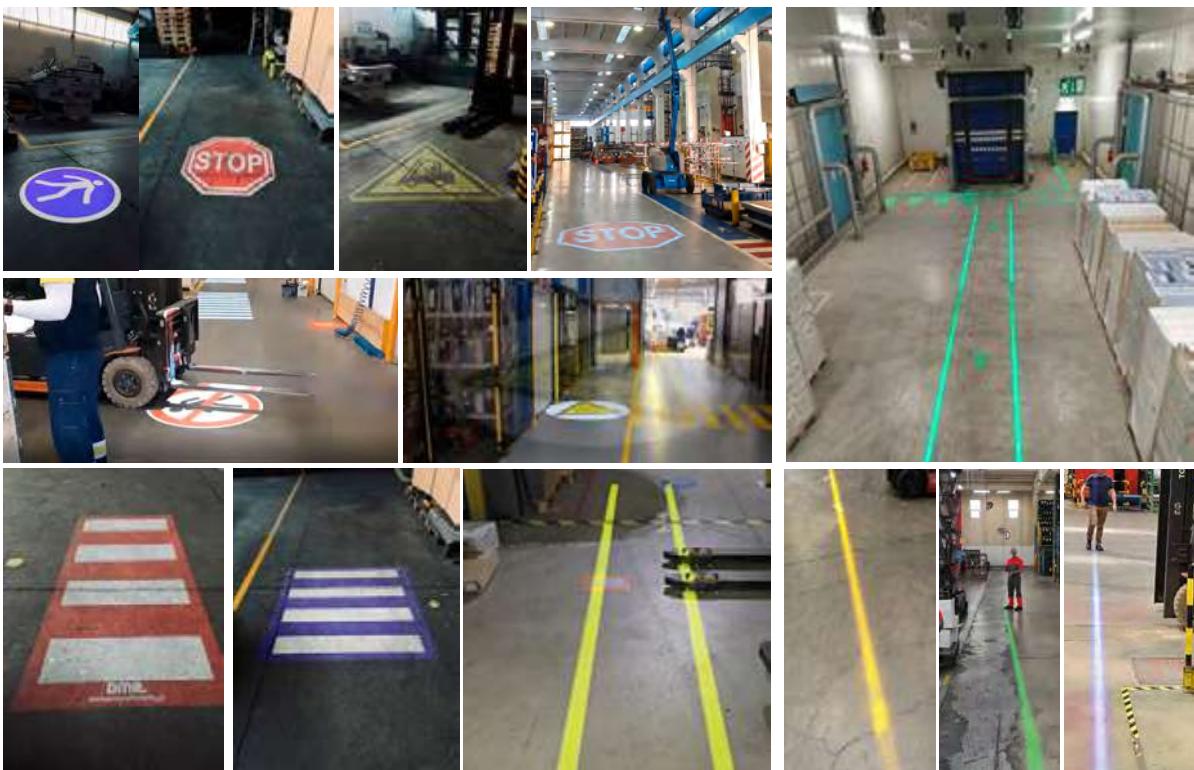

| OPTICS for 320W | PROJECTION RATIO | INSTALLATION HEIGHT | PROJECTION DIAMETER |
|--------------------|---------------------|------------------------|------------------------|
| Lens from 10° | 1:0,17 | 4 M | 68 CM |
| Lens from 13° | 1:0,22 | 4 M | 100 CM |
| Lens from 20° | 1:0,32 | 4 M | 128CM |
| Lens from 25° | 1:0,42 | 4 M | 168CM |
| Lens from 30° | 1:0,55 | 4 M | 220 CM |
| Lens from 47° | 1:0,87 | 4 M | 348 CM |

N.B. The optics and gobos of the 320W model are not interchangeable with any other model.

VISUAL MANAGEMENT OFFICE ACCESSORIES

In this category, we offer essential products for Visual Management, a methodology that simplifies process management through visual communication. With clear and easily understandable solutions, Visual Management transforms workspaces into informative environments where every team member can quickly access the information they need. Clear visibility and effective communication are key elements for optimizing production, supporting the implementation of the 5S method, and promoting lean and organized management of business processes.

Scan the QR code to discover why DMR visual displays are your ideal choice!

— 30 — MAGNETIC FRAME WINDOW – MAGNETIC ADHESIVE

The frame window is the ideal solution for displaying notices in a practical and effective way. Thanks to the front panel with magnetic closure, sheets can be quickly replaced while remaining perfectly readable from both sides. Adhesive or magnetic mounting ensures secure attachment to smooth, solid indoor surfaces such as doors, cabinets, glass, and walls, and allows the frame to be removed without leaving marks, particularly on glass. The symmetrical frame design also allows for both vertical and horizontal orientation, ensuring maximum versatility and ease of use.

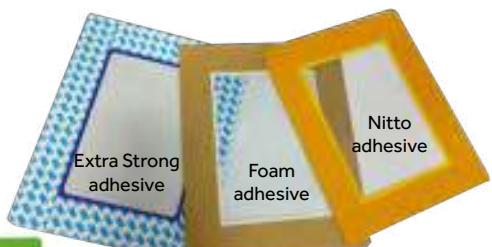

— 30 — ADHESIVE FRAME WINDOW WITH FLOOR DISPLAY PANEL

The window with a protective PVC panel is designed to provide maximum protection and durability for documents and notices. The panel resists wear from frequent contact and the passage of forklifts or trolleys, while the colored adhesive border enhances visibility, making it immediately recognizable. The adhesive ensures a stable and long-lasting floor attachment, preventing accidental movement even in high-traffic areas. This solution protects documents from dust, foot traffic, and damage, offering superior robustness and safety compared to traditional framed displays. The window can be supplied with different types of adhesive to suit any need:

Extra Strong: maximum hold on high-stress floors

Foam: ideal for non-slip or high-humidity surfaces

Nitto: reliable and durable on smooth or heavily used surfaces

Available in
high-visibility
fluorescent colors

ANTI-SLIP / ANTI-SKID STRIP

In this category, we offer a complete range of solutions designed for safety in slip-risk environments. Our products effectively protect stairs, floors, and corners, significantly reducing the risk of accidents.

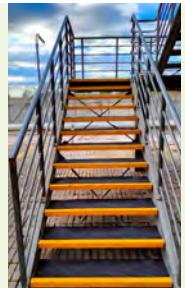

Thanks to their anti-slip and non-skid technology, they provide optimal grip and reliable protection, both in workplaces and public spaces. Choosing our solutions means creating safer, more efficient, and secure environments, where accident prevention becomes simple and effective.

Certified according to R13 standard.

STAIR NOSINGS

Stair nosings are designed for easy and quick installation on existing steps made of wood, concrete, steel, and other materials.

Their non-skid design ensures excellent slip resistance even in extreme conditions, such as water, ice, or grease. Certified to the R13 standard, they provide the highest level of safety, protecting both people and environments in every application.

CORNER PROTECTORS

The fiberglass anti-slip corner protector is an economical and effective solution to enhance safety on stairs and steps. Its rounded profile, permanent non-slip surface, and high-visibility yellow color provide long-lasting, immediately noticeable protection, reducing the risk of accidents in any work environment.

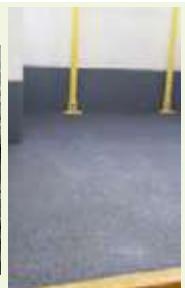

FIBERGLASS HANDRAIL COVER

The fiberglass handrail cover is an essential device for enhancing stair safety, even on existing wooden and metal steps. Manufactured using pultrusion technology, it features a non-slip surface reinforced with quartz granules, ensuring secure grip, wear resistance, and long-lasting protection against slips and falls.

LAMINATES

The PRFV (Fiberglass Reinforced Polyester) laminate features a monolithic structure made of layered glass fabrics and a polyester resin matrix resistant to chemical agents. Thanks to its permanent non-slip surface, this laminate ensures safety on various surfaces, providing long-lasting protection against slips and falls. Installation is quick and easy, compatible with both sealant adhesives and bolted fastenings, offering convenience without compromising strength and reliability.

GRATING PANELS

Grating panels provide an innovative non-slip surface, achieved through quartz granules integrated directly into the material.

The double-layered cured vinyl ester resin treatment ensures excellent corrosion resistance and superior grip, even in critical conditions such as water, ice, grease, or dirt. Thanks to their high wear resistance, these grating panels deliver reliable, long-lasting performance, offering consistent protection in any work environment.

ANTI-SLIP TAPES

Immediate Anti-Slip Protection

Our standard range provides instant safety on floors and walkways. For uneven surfaces, such as worn stairs, adaptable versions ensure easy and uniform application, even where traditional coverings would fail.

Safety in Challenging Environments

The Safety Navy Boat line is designed for food processing and marine environments. Waterproof and resistant to harsh agents, it protects both people and surfaces under any condition.

Durability and Performance Without Compromise

Made from extremely durable material with permanent anti-slip properties, it can be applied almost anywhere. Compliant with international safety standards, our products maintain performance even at extreme temperatures, down to -30°C.

Total Flexibility

Tapes can be cut into any shape or design, fully customizable to your needs. Anti-slip protection becomes as versatile as your project.

Where You Can Use It:

Work Environments:

Industrial warehouses, offices, workshops, locker rooms.

Sports and Recreational Facilities:

Swimming pools, sports complexes, wellness centers, thermal spas.

Healthcare Facilities:

Hospitals, nursing homes, medical offices.

Education and Retail:

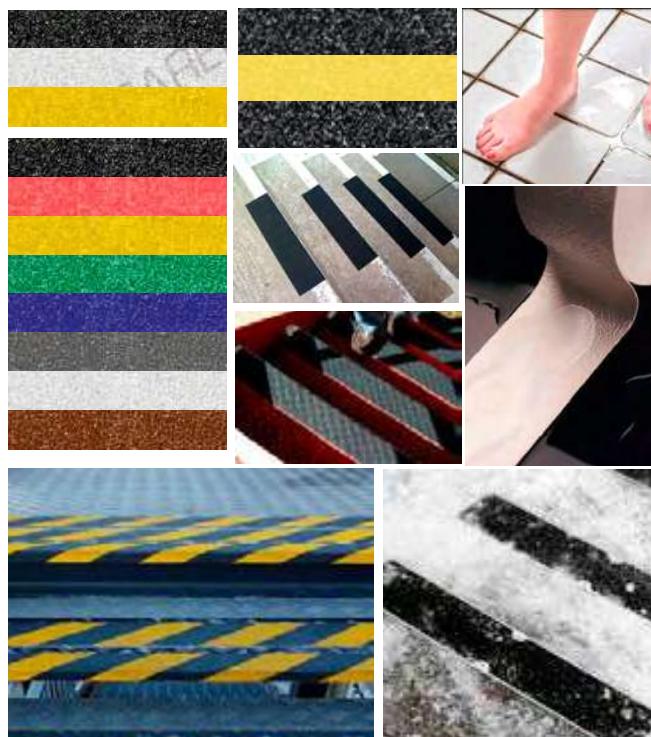

Schools, shopping centers, supermarkets, department stores, covered markets.

Food Service and Hospitality:

Kitchens, restaurants, hotels, canteens, bars.

Homes and Entrances:

General entrances, stairways, bathtubs, showers, private residences.

LUMINESCENT SAFETY TAPES

Our luminescent adhesive tape absorbs light and gradually releases it, providing bright and long-lasting illumination.

Available in various lengths and widths, it is ideal for theatrical shows, events, or creating striking visual atmospheres.

In emergency situations or low-light conditions, the Safety Luminescent tape becomes a valuable safety tool: it marks emergency exits, hazardous passages, and obstacles, ensuring immediate visibility even at night. One product, two functions: safety and creativity in a single solution.

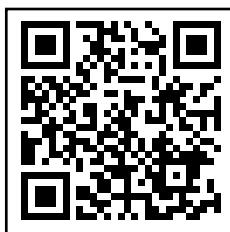

R13 ANTI-SLIP CERTIFIED

Example of Use

ANTI-SLIP ABSORBENT MATS

Our anti-slip absorbent mats trap liquids, oils, and dust, keeping environments clean and safe. Made from highly durable materials, they withstand continuous traffic from pedestrians, forklifts, pallet trucks, and other moving equipment without losing effectiveness.

Ideal for companies, offices, supermarkets, logistics areas, hotel entrances, and public facilities, they provide a practical and long-lasting solution to ensure safety, hygiene, and order in any workplace.

Scan the QR code to discover how to keep your floors safe and clean—the solution that replaces traditional rental mats!

STICKY DECONTAMINATION MATS

Sticky decontamination mats are designed to remove dirt and impurities from shoes and wheels, helping to reduce the spread of bacteria and maintain high hygiene standards in controlled areas. They are made with peel-off polyethylene adhesive sheets that effectively capture dust, debris, and contaminants. Each layer can be removed as needed, revealing a fresh, clean surface.

Easy to use and highly efficient, these mats are the ideal solution for entrances to laboratories, operating rooms, production areas, and sterile zones, where cleanliness is essential for safety and work quality.

Nitrile base with gray frame, designed to hold the Sticky Mats

35

WASHABLE ANTIBACTERIAL PVC MAT

Washable antibacterial PVC mats provide a waterproof and durable surface suitable for all floor types and capable of withstanding light to heavy traffic up to 3000 kg. They prevent the growth of microorganisms and reduce static charges, offering 100% protection in compliance with ISO 22196:2011. To preserve their integrity, carts should move in a straight line, avoiding turns or rotations on the mat.

Maintenance is simple: spray with detergent, let it act, remove residues with a sponge and scraper, and thoroughly dry the surface. With regular cleaning, these mats ensure long-lasting effectiveness and maximum safety, providing a practical and durable solution for workplaces and high-traffic entrances.

Recommended for the Following Sectors:

Healthcare Sector: including public hospitals, private nursing homes, medical clinics, dental offices, and pharmacies.

Industrial Sector: particularly pharmaceutical, food, and cosmetic industries, as well as electronics and clinical analysis laboratories.

Sports and Research Facilities: where hygiene and safety are essential.

ANTI-SLIP ABSORBENT MAT

The absorbent mat with an adhesive backing combines safety, practicality, and innovation. It is the first mat that stays in place without the need for additional tapes, adhering to any floor without leaving residues. The adhesive backing keeps the mat securely positioned, preventing shifting or slipping, while collecting spills and drips even in high-traffic areas or on slightly inclined surfaces.

Hot-fused and reinforced, it easily withstands foot traffic and forklifts without tearing or showing wear. The polyethylene backing creates a waterproof barrier, while the Gryp System anti-slip treatment reduces the risk of falls by up to 90%. Easy to remove and replace, it streamlines cleaning and ensures floors remain safe and dry. Anti-slip R13 certified.

The sticky mat is certified by the National Floor Safety Institute (NFSI) as a high-traction surface. When integrated into a floor safety program, it significantly reduces slip hazards and liability claims, providing protection, reliability, and peace of mind in the workplace.

Where You Can Use It:

- Industries and warehouses
- Storage and logistics areas
- Offices and corporate entrances
- Supermarkets and department stores
- Restaurants, kitchens, and canteens
- Hotels and hospitality facilities
- Hospitals, clinics, and medical offices
- Sports centers and gyms
- Laboratories and controlled-hygiene environments
- High-traffic pedestrian areas
- Areas with forklift or pallet truck use

CUSTOMIZABLE ANTI-SLIP ABSORBENT MAT

The absorbent mat keeps floors safe and dry, but it can be much more: customize it with logos, images, or unique graphics to showcase your brand.

Stable thanks to its adhesive backing, it is ideal for high-traffic areas, combining safety, practicality, and brand visibility in a single solution.

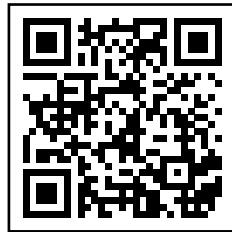

ACCESSORIES FOR THE "ABSORBENT" LINE

Easy to Apply: Installs quickly using our dedicated tools, allowing straight cuts or 45° angles, ensuring precision, durability, and perfect adhesion.

DIMENSIONS FOR CUSTOMIZATIONS

Scan the QR code to discover the LTMAT drive-over mat: removes dirt and moisture from wheels, dries quickly, and supports loads up to 6 tons.

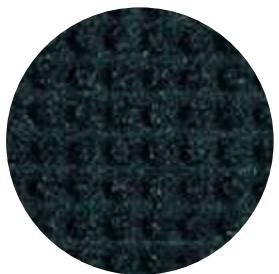

LTMAT DRIVE-OVER ABSORBENT WHEEL-CLEANING MAT

The LTMAT drive-over mat is designed to keep floors and vehicles clean and safe. Its dual-level surface effectively removes moisture and dirt from forklift wheels, protecting both personnel and equipment during transit. The rubber base supports heavy traffic up to 6 tons, while the ultra-strong bio-adhesive keeps the mat stable even under intense conditions.

Easy to install, modular, and adaptable to any configuration, it cleans quickly and dries in a short time. Ideal for companies and facilities with high forklift traffic, the LTMAT wheel-cleaning mat ensures cleaner floors, optimized safety, and long-lasting performance, even in the most demanding work environments.

Main Advantages:

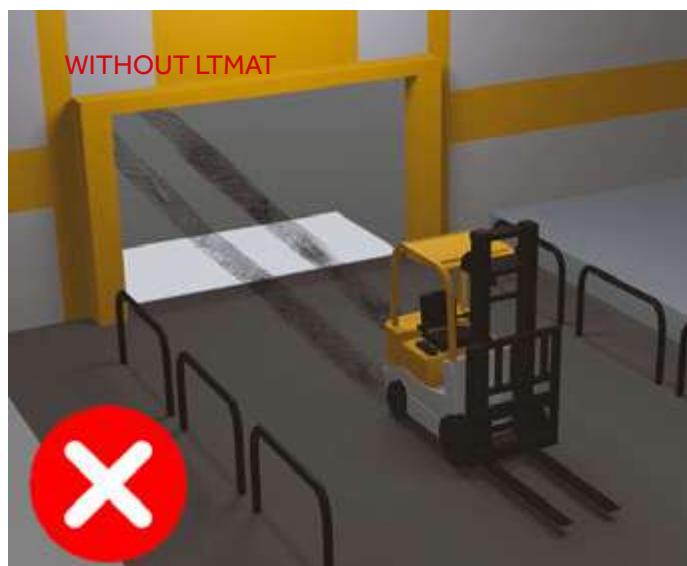

- Effective Removal: Dual-level surface eliminates dirt and moisture from wheels.
- Traffic Resistance: Supports forklifts up to 6 tons.
- Easy Installation: Modular and adaptable to different layouts.
- Guaranteed Stability: Ultra-strong adhesive prevents movement.
- Easy Maintenance: Quick cleaning and fast drying.
- Enhanced Safety: Reduces slips and risks for both personnel and vehicles.

Bio-Adhesive for LTMAT

37

IMPACT PROTECTIONS

This category includes products specifically designed to absorb impacts, protect, and ensure safety in corporate and industrial environments, where protection requirements are particularly high. Our solutions are built to withstand the most demanding working conditions, providing reliable protection and reducing the risk of accidents and impacts to people and property.

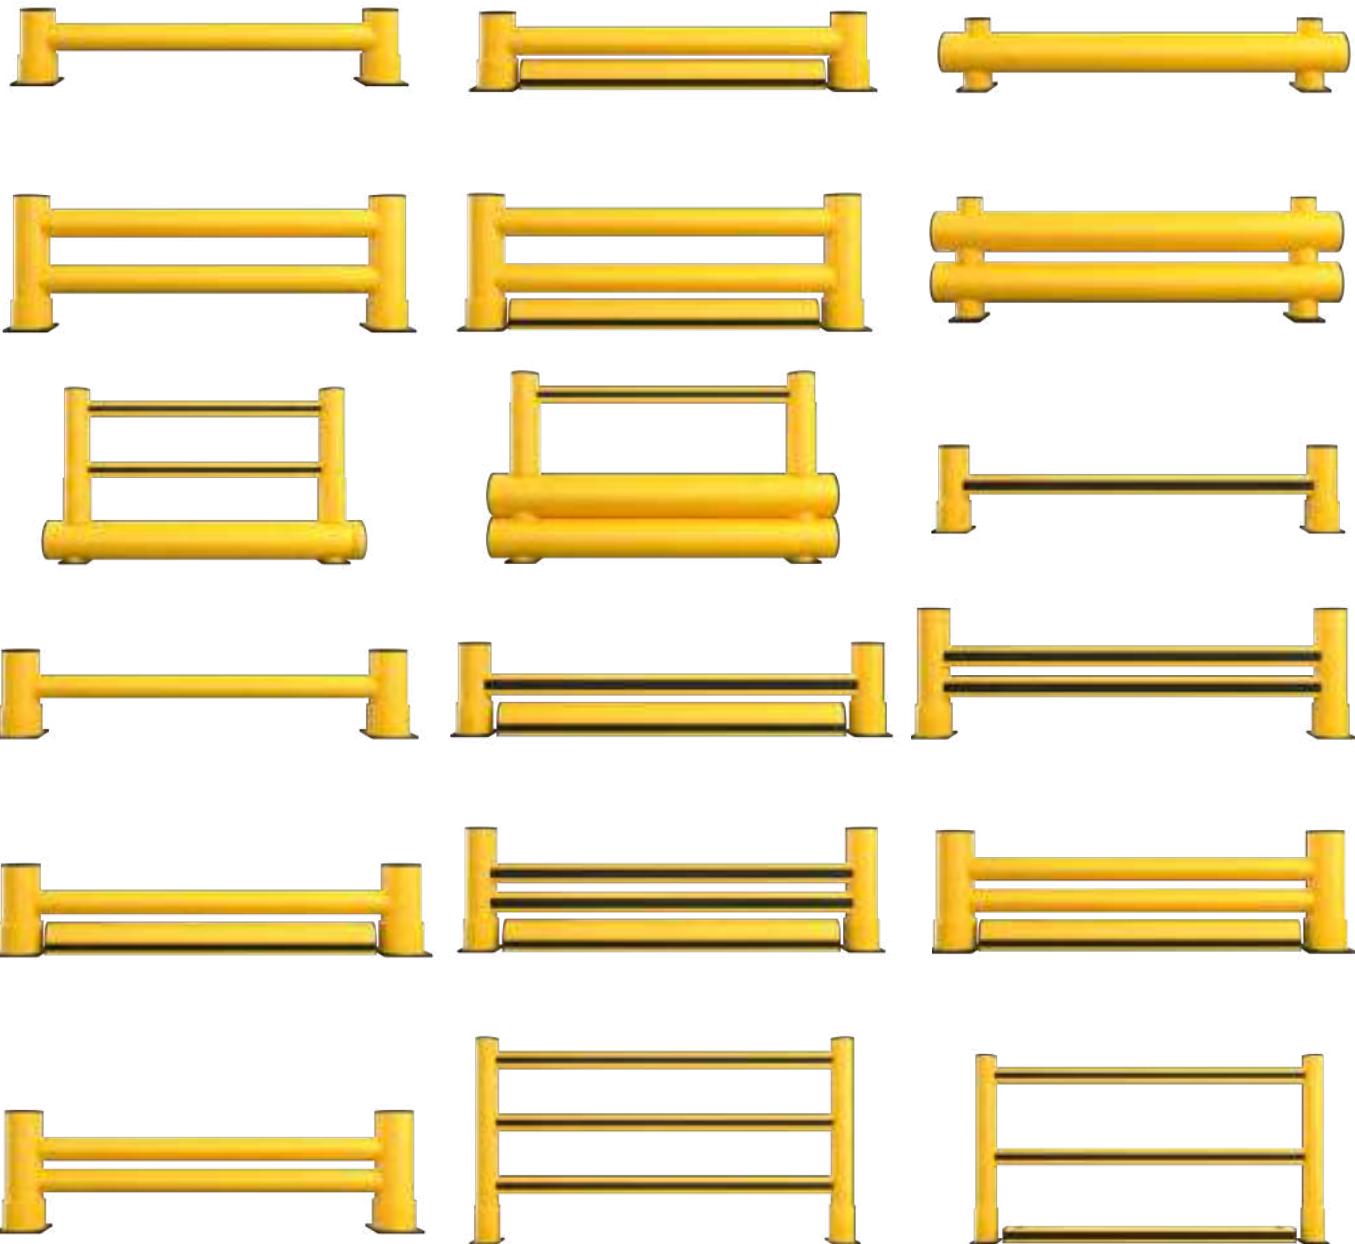

Beyond industrial use, these products are also suitable for schools, gyms, and parking areas, where safety remains a priority, offering long-lasting protection in high-traffic environments.

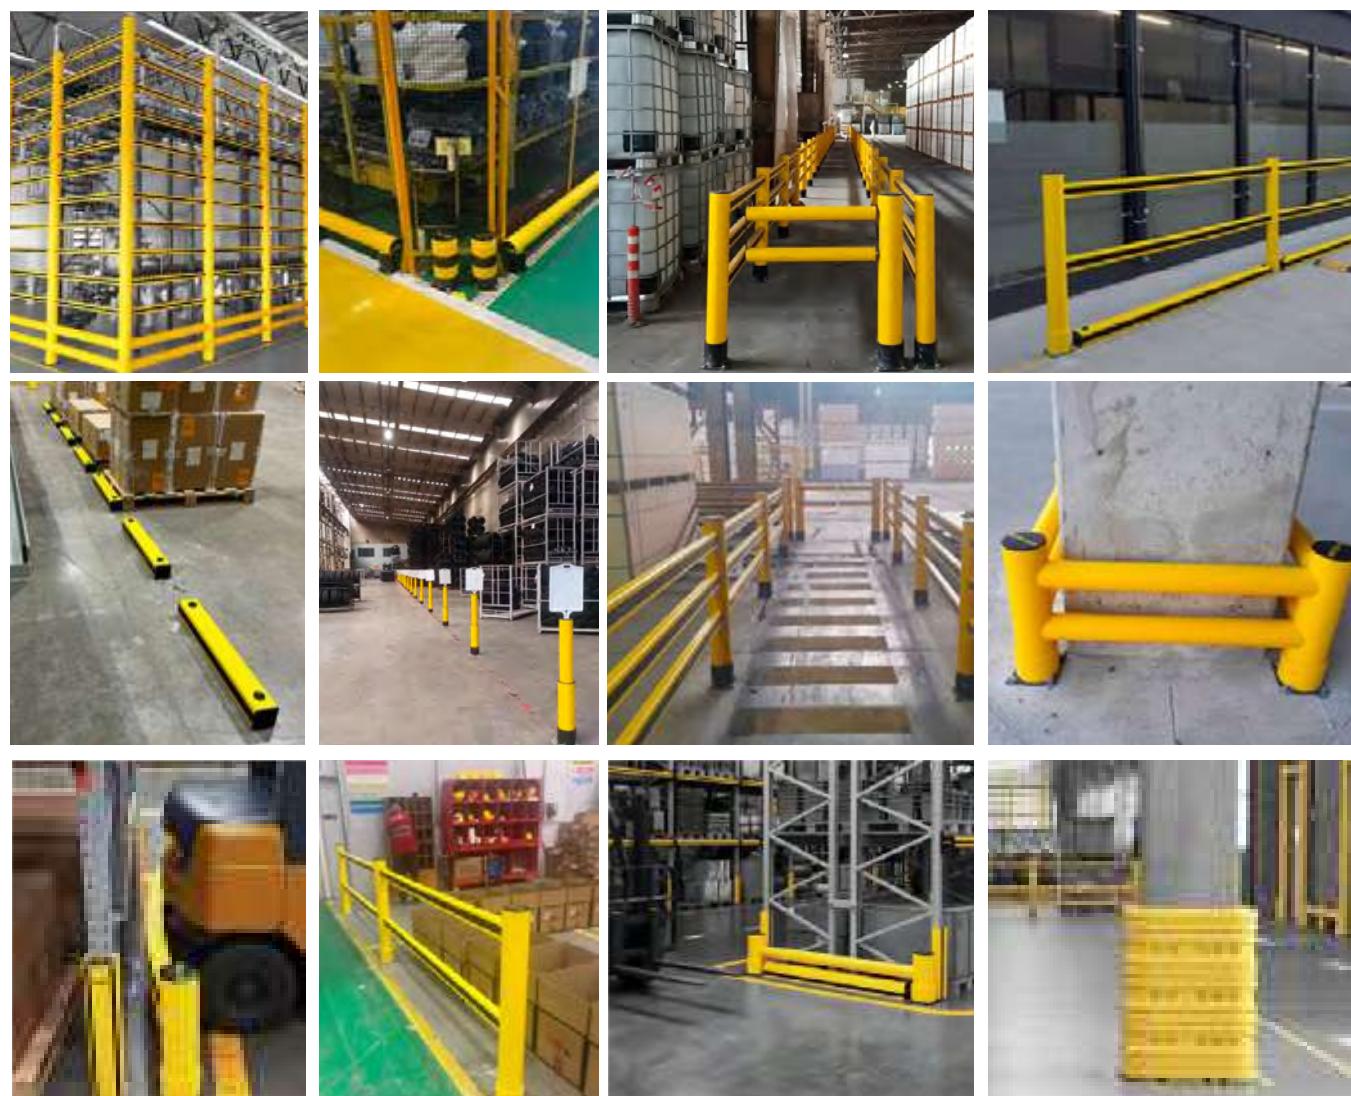

YOUR SAFETY PARTNER

Thanks to qualified personnel and specialized equipment, DMR designs and manufactures custom barriers perfectly tailored to the client's needs. Efficiency, safety, and precision in every solution.

IMPACT-RESISTANT PVC PROTECTION BARRIERS

PROFILES04

The Profiles04 is a column protection made of high-density HDPE, designed to withstand even the harshest conditions. Ideal for industrial environments, warehouses, and vehicle traffic areas, it safeguards columns and vertical structures from accidental impacts, protecting both structures and personnel.

Its versatile shape easily adapts to columns of various sizes and profiles, providing effective protection without complex modifications. The high-density material ensures impact resistance and reliable performance even at extreme temperatures, down to -40°C.

Installation is simple and immediate: the Profiles04 attaches directly to the column, creating a secure protective cushion. Impact resistance has been validated through Finite Element Analysis (FEA) to guarantee the highest standards of safety and reliability.

FORKLIFT BUMPER PROTECTION

Made of durable rubber, this bumper protector is ideal for both indoor and outdoor use, safeguarding people, vehicles, structures, and surfaces from impacts and collisions. Pre-drilled mounting holes allow for quick and secure installation on any type of surface.

ADDITIONAL PRODUCTS

LED bumpers feature integrated LED strips, with adjustable brightness to suit operational needs. This allows targeted illumination of work areas, enhancing visibility and increasing safety during maneuvers or operations in poorly lit zones.

LED BUMPER PROTECTOR

Available also with integrated LED lighting

ADHESIVE PROFILE PROTECTOR

Protective corner guards made with padded, flexible cushions and a flat surface for perfect adhesion. Ideal for absorbing impacts and protecting edges or profiles in industrial, logistics, or commercial environments. The integrated adhesive allows for quick and secure installation on various types of surfaces.

T-SLOT LINE

T-Slot profiles are modular bars made of durable material, designed to create customizable structures and supports in industrial environments. Their distinctive "T" section allows accessories, joints, and protective elements to be inserted quickly and securely, without the need for double-sided tape or adhesives.

These profiles are easy to install with a snap-fit system and can be rapidly reconfigured according to operational needs, offering flexibility, safety, and space optimization. Ideal for protecting machinery, work lines, and ensuring the safety of operators and personnel.

Colori e dimensioni:

ADHESIVE BUMPER BUFFERS

In dynamic production environments, where carts and equipment are constantly in motion, accidental impacts against edges and surfaces can cause damage and injuries. Our adhesive corner bumpers provide a simple, effective, and ready-to-use solution, protecting people, machinery, and workspaces.

Easy to apply on any surface, they absorb impacts and minimize the risk of accidents, helping create a safer and more productive environment. A practical and reliable solution for those seeking to combine safety, efficiency, and protection of company assets.

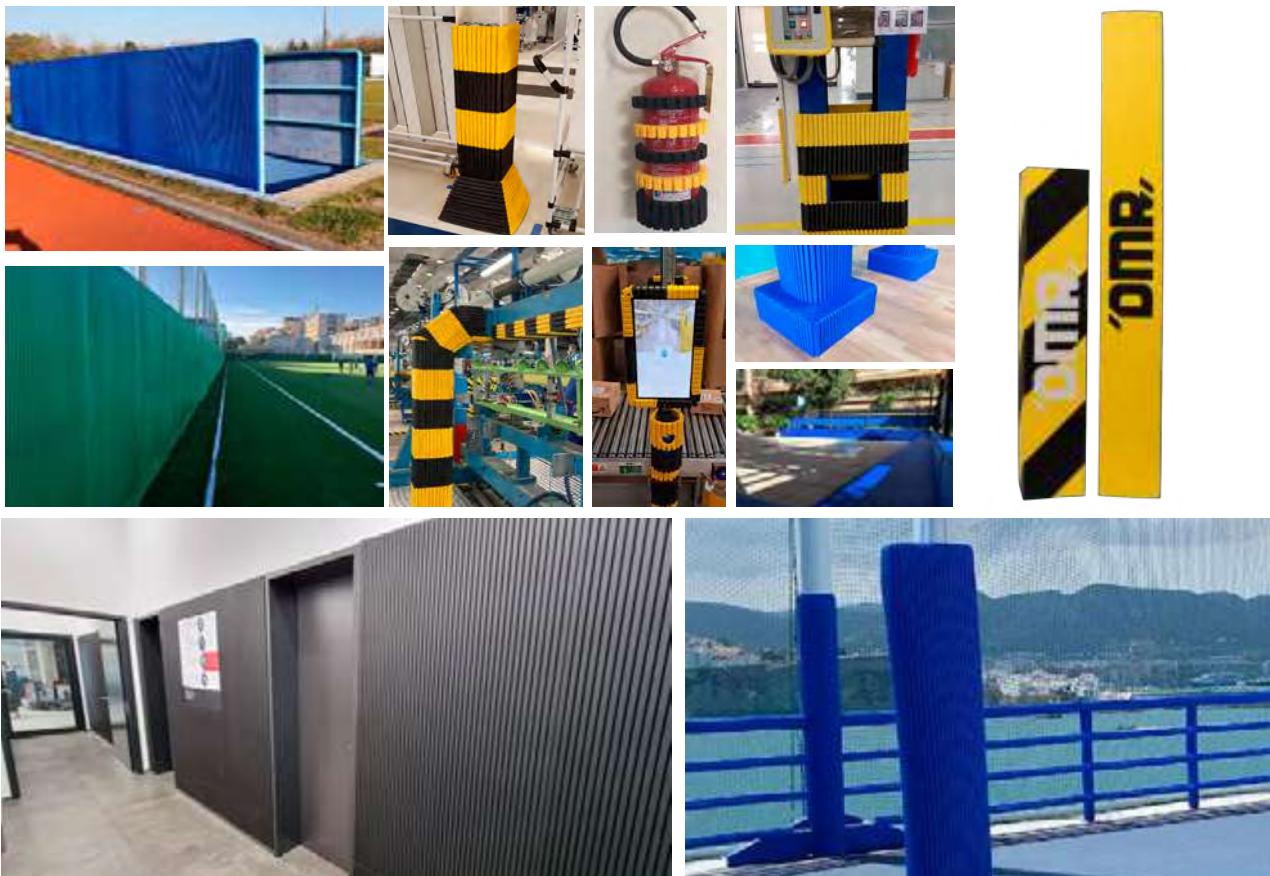

BUFFER BUMPERS ARE ALSO AVAILABLE IN A MAGNETIC VERSION

—◆ SOFT PROTECTIONS / SECURSOFT - Non-toxic / Fire-resistant

SECURSOFT protections provide maximum safety against impacts and accidents on sharp edges and corners, combining two key features:

Non-toxic: Completely safe even in environments frequented by children, ideal for schools and kindergartens, posing no risk in case of contact or accidental ingestion. Fire-resistant: Made with certified fire-resistant materials, offering reliable protection in offices, hotels, sports centers, wellness facilities, and healthcare environments. The protections are made of certified anti-trauma rubber: soft, waterproof, washable, and resistant to temperature variations, making them perfect for both indoor and outdoor use. Combining functionality, durability, and practicality, SECURSOFT protects people and objects without compromising the aesthetics of the space.

42

—◆ SOFT PROTECTIONS / SECURSOFT IN SMOOTH E.V.A.

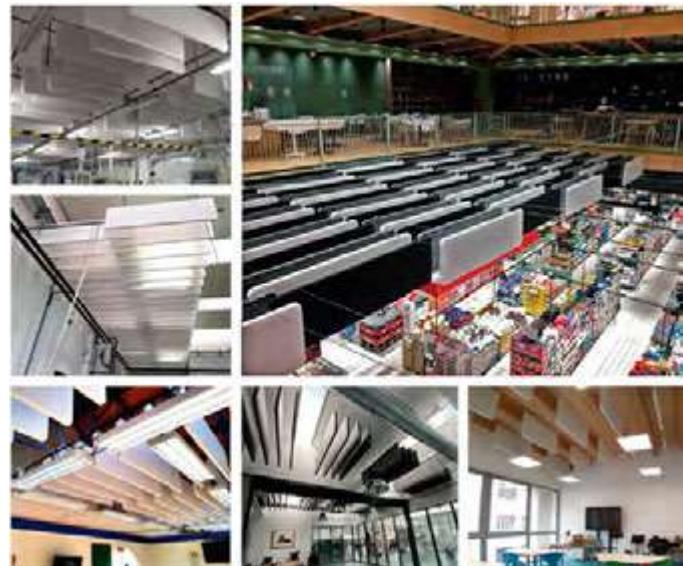

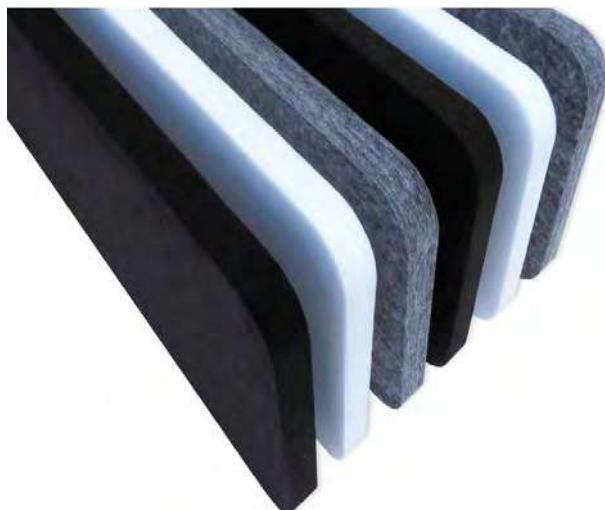

Soft to the touch, strong against impacts

ACOUSTIC POLYESTER SOUND-ABSORBING BAFFLES

Our polyester sound-absorbing panels are ideal for improving acoustics in large communal areas and industrial spaces, offering an excellent balance between high performance and cost-effectiveness. When installed vertically from the ceiling, both sides of the panels absorb direct sound waves, optimizing overall acoustic performance.

The advanced construction features a surface thermo-smoothing of the polyester followed by precise shaping, which makes the material more compact and efficient, eliminating the need for additional containment structures. Made from eco-friendly, recycled, and recyclable materials, the panels meet sustainability standards, providing an effective and responsible solution for noise management in any environment.

PAVINDUSTRY

Pavindustry is an industrial tile made 100% of PVC, featuring an elegant hammered finish that combines aesthetics and functionality. Robust and durable, it is designed for quick and intuitive installation: the interlocking system eliminates the need for adhesives, allowing simple and immediate placement even without specialized labor. Ideal for indoor environments such as garages, warehouses, and gyms, Pavindustry is drive-over capable and provides excellent protection against falling tools and objects, reducing the risk of breakage and damage. The glue-free installation allows flooring to be laid without interrupting operations or moving machinery and equipment. To ensure long-lasting performance, the tiles are treated with an exclusive protective coating—the only one of its kind in Europe—that enhances resistance to abrasion and dirt. The result is a floor that is easy to clean, wear-resistant, and capable of maintaining its appearance even under intensive use.

CUSTOMIZE YOUR FLOOR

TOP LAYER RUNNERS – SBR RUBBER

Our Top Layer runners are designed to offer excellent wear resistance, making them ideal for floors, shelves, and a wide range of industrial applications. Perfect for workshops and work environments where slippery objects are handled—such as workbenches, carts, vehicles, or van compartments—they provide durability and protection even under the most demanding conditions. Made from high-strength SBR rubber, these mats effectively resist acids and alkalis, ensuring safety, reliability, and consistent performance in every operational scenario.

Comfort that works for you!

ERGONOMIC MATS

Like all ergonomic tools, the DMR ergonomic mat is designed to work in harmony with the human body, supporting its natural movements throughout the day. It is engineered to provide an optimal balance between compression and load resistance, essential for properly engaging the muscles of the feet, legs, and lower back.

This is achieved through the use of high-quality materials and patented profile designs.

POLYURETHANE MATS

CLASSIC: AB CLASSIC/CLASSIC DELUXE

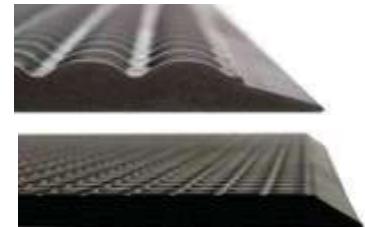

Recommended for use in dry, non-abrasive environments
Applications: Industry: automotive, assembly, molding
Logistics: e-commerce, packaging, sorting
Laboratories: cleanrooms ISO 5, R&D, metrology, optics, micro-mechanics

8-YEAR WARRANTY

BUBBLE SURFACE (in the AB Classic version)
SMOOTH SURFACE (in the Classic Deluxe version)
PERFORATED OPTION AVAILABLE ON REQUEST (for air, liquids, and grated flooring)
IDEAL FOR ENVIRONMENTS REQUIRING STATIC CONTROL
BLACK RAMPS INCLUDED; on request, YELLOW PERIMETER RAMPS can be supplied
4 cm (Classic model)
5 cm (Deluxe model)

Certified for Cleanroom Use – ISO 5

ESD/Antistatic Certified – compliant with IEC 61340-4-1 and ANSI/ESD STM7.1-2001 standards (where applicable)

EXTREME INFINITY: BUBBLE/ SMOOTH / DELUXE ESD / LOGO MAT

Recommended for use in dry or slightly damp environments, with resistance to chemicals and liquid spills. Applications: Heavy Industry: automotive, assembly, painting
Pharmaceutical: medical, pharmaceutical, cosmetic
Laboratories and Clean Internal Logistics

6-YEAR WARRANTY

AVAILABLE IN VARIOUS COLORS

BUBBLE SURFACE (in the Infinity Bubble version)
SMOOTH SURFACE (in the Infinity Smooth and Deluxe versions)
CLOSED, NON-POROUS SURFACE
IDEAL FOR DRY (OR SLIGHTLY DAMP) ENVIRONMENTS
RESISTANT TO CHEMICALS AND UV RAYS
CUSTOM GRAPHICS AVAILABLE ONLY in the Logo Mat version
BLACK RAMPS INCLUDED; on request, YELLOW PERIMETER RAMPS can be supplied:
4 cm (Infinity Bubble/Smooth versions)
5 cm (Deluxe version)

The Logo Mat combines ergonomics with high-definition graphics to communicate branding, safety, and 5S directly on the floor—without paint and with quick repositioning.

BASIC: BUBBLE / SMOOTH/ BUBBLE DOWN

Recommended for use in light production and assembly areas with dry conditions. Applications: retail, production lines, large-scale distribution, and offices.

2-YEAR WARRANTY

COLOR: Gray

SUITABLE FOR VERY WET OR OILY ENVIRONMENTS

RESISTANT TO MANY ACIDS AND HOT METAL SHAVINGS WITH SHORT

EXPOSURES UP TO 600 °C (UNI EN ISO 2812-1)

DESIGNED WITH ENHANCED STATIC CONTROL

FLAME RETARDANT

OPTION TO ADD HOLES

ON REQUEST, YELLOW PERIMETER RAMPS 2.5 CM ARE AVAILABLE

SOFTLINE / SOFTLINE con vasca di raccolta

Recommended for welding and metalworking, for wet, dry, and aggressive environments; applications: welding and carpentry, heavy mechanical operations, wet or demanding areas, processes with hot shavings and splashes.

3 YEARS WARRANTY

COLOR BLACK, GREY, BLUE

RESISTANT TO OIL, ACIDS, PETROCHEMICAL PRODUCTS, AND HOT METAL SHAVINGS (SPARK-RESISTANT) WITH SHORT EXPOSURES UP TO 600 °C (UNI EN ISO 2812-1)

DESIGNED WITH ENHANCED STATIC CONTROL

FLAME RETARDANT

OPTION TO ADD HOLES

ON REQUEST, YELLOW PERIMETER RAMPS 2.5 CM ARE AVAILABLE

ENDURANCE INDUSTRY

Recommended for areas with large volumes of liquids: degreasing, washing, pretreatments; applications: butcheries, fish markets, dairies, workshops with emulsions or oils, maintenance stations, large work islands, uneven floors, environments requiring high chemical resistance.

5 YEARS WARRANTY

GRID STRUCTURE

COLOR BLACK

RESISTANT TO HIGH EXPOSURE TO LIQUIDS, OIL, CHEMICALS, WATER, AND MATERIAL BUILD-UP

DESIGNED WITH ENHANCED STATIC CONTROL

BLACK RAMPS INCLUDED; ON REQUEST, YELLOW PERIMETER RAMPS

5 CM CAN BE SUPPLIED

RUBBER MATS

HYGIENE

Recommended for the food industry and laboratories; applications: food and beverage industry, analytical and microbiology laboratories, pharmaceutical and cosmetic sectors with high hygiene requirements, as well as canteens and delicatessens with CIP cycles.

3 YEARS WARRANTY

COLOR GREEN - BLUE - RED - GREY

SUITABLE FOR FOOD ENVIRONMENTS AND LABORATORIES

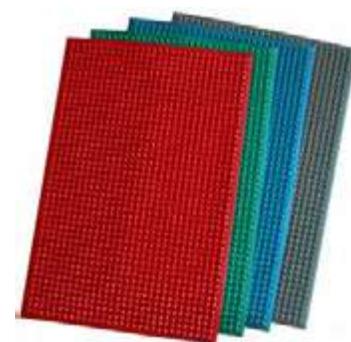

RESISTANT TO ACIDS, CHEMICALS, ALCOHOL, WATER, AND CHLORINE

ANTIBACTERIAL AND ANTISTATIC PROPERTIES

EASY TO CLEAN

ON REQUEST, YELLOW PERIMETER RAMPS 2.5 CM ARE AVAILABLE

Certified – Compliant with USDA and
CFIA, suitable for ISO Class 5
(Class 100) cleanrooms,
made of 100% EPDM

SUPER SAFE SMOOTH/ERGO

Recommended for wet and/or slippery areas; applications: food environments, laboratories, hospitals, nursing homes, airports.

3 YEARS WARRANTY

SUITABLE FOR FOOD ENVIRONMENTS, LABORATORIES, HOSPITALS, NURSING HOMES, AIRPORTS

RESISTANT TO ACIDS, CHEMICALS, ALCOHOL, WATER, AND CHLORINE (UNI EN ISO 2812-1)

ENRICHED WITH AN ANTIMICROBIAL ADDITIVE TO INHIBIT BACTERIAL GROWTH AND MOLD

CAN BE STERILIZED

MATS WITH LED

DELUXE LED/ SOFTLINE LED

Recommended for workstations requiring targeted lighting; applications: ergonomic mat with integrated LEDs, silver reflective surface to enhance ambient brightness, improve visibility and protect eyesight through uniform light distribution.

COLOR GREY, WHITE, BLACK, SILVER

SMOOTH SURFACE (in the Deluxe and Softline versions)

IDEAL FOR DRY ENVIRONMENTS

IDEAL FOR AREAS REQUIRING STATIC CONTROL

SUSTAINABLE ERGONOMIC MAT

Recommended for retail, industrial, and logistics environments; eco-friendly product to transform the workplace with sustainability and safety.

SUSTAINABLE INNOVATION

CLOSED-LOOP MAT COMBINING HIGH PERFORMANCE AND ENVIRONMENTAL RESPECT.

ECO-FRIENDLY: MADE WITH RECYCLED MATERIALS AND UPCYCLING PROCESSES, WITHOUT COMPROMISING COMFORT, ERGONOMICS, AND DURABILITY.

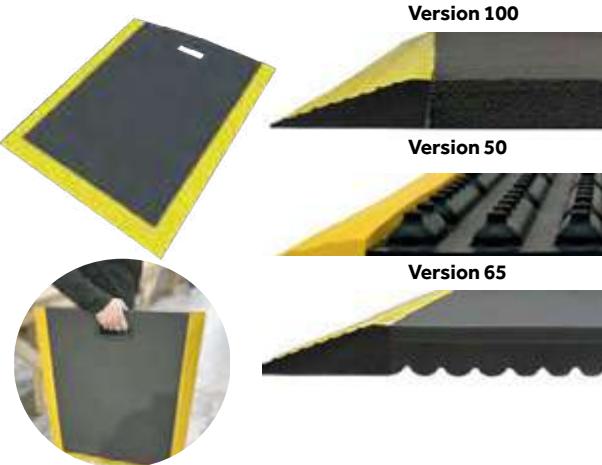

VERSATILE MAT, ALSO AVAILABLE IN THE KNEELING WORK VERSION

ON REQUEST, YELLOW PERIMETER RAMPS 2.5 CM ARE AVAILABLE

Version 100

Version 50

Version 65

LAMINATED MATS

VIKING ESD

Recommended for areas with trolley and wheeled traffic; applications: industrial assembly lines, mechanical workshops, electronics companies, warehouses and logistics, manufacturing industries.

NITRILE + FOAMED EPDM
COLOR BLACK, GREY, BLUE
SMOOTH SURFACE THAT FACILITATES THE MOVEMENT OF WHEELS/TROLLEYS
RESISTANT TO DILUTED ACIDS AND ALKALIS
DESIGNED WITH STATIC CONTROL
EASY TO CLEAN

RONDO /DIELECTRIC ROD

Recommended for areas with trolley and wheeled traffic; applications: technical laboratories, light industries, production departments with operators standing for long hours and frequent movement, customers requiring higher and customizable comfort.

NITRILE + FOAMED EPDM
COLOR BLACK, GREY, BLUE
BEVELED EDGES ON ALL SIDES
SMOOTH SURFACE THAT FACILITATES THE MOVEMENT OF WHEELS/TROLLEYS
RESISTANT TO DILUTED ACIDS AND ALKALIS
DESIGNED WITH STATIC CONTROL
EASY TO CLEAN

PYRAMID

Recommended for extreme environments; applications: metal fabrication shops, welding departments, and heavy mechanical workshops; production with high-temperature machine tools, flame-retardant.

NITRILE + FOAMED EPDM
COLOR BLACK, GREY, BLUE
BEVELED EDGES ON ALL SIDES
SMOOTH SURFACE
RESISTANT TO CHEMICALS AND WELDING SPARKS
FLAME-RETARDANT PROPERTIES
DESIGNED WITH STATIC CONTROL
EASY TO CLEAN

OPTIMAL

Recommended for retail, large-scale distribution, electronics and precision assembly, automotive industry, and pharmaceutical sector; examples: H&M (checkout and sales areas), high-intensity assembly lines, companies focused on safety, health, and brand enhancement.

NITRILE + FOAMED EPDM
COLOR BLACK, GREY, BLUE
BEVELED EDGES ON ALL SIDES
SMOOTH SURFACE
RESISTANT TO CHEMICALS
DESIGNED WITH STATIC CONTROL
EASY TO CLEAN

CHAIR MAT

Recommended for work environments with standing operators; ideal for providing relief and comfort, facilitating the transition between standing and seated positions during working hours.

NITRILE + FOAMED EPDM
COLOR GREY
BEVELED EDGES ON ALL SIDES
SMOOTH SURFACE
FLAME-RETARDANT PROPERTIES
EASY TO CLEAN

ERGONOMIC CHAIRS

The use of ergonomic chairs is essential to prevent fatigue and physical strain associated with repetitive work in static positions. Maintaining the same posture for long periods can overload the spine, muscles, and circulation, causing pain, tiredness, and long-term health issues.

Workplace ergonomics is therefore crucial and regulated by Legislative Decree 81/2008, which emphasizes its importance in workstation design and equipment selection. Ergonomic chairs and supports help reduce the harmful effects of monotonous and repetitive work, improving comfort, safety, and productivity.

ERGONOMIC CHAIRS – Laboratory

The new generation of seating for critical environments designed for laboratories, healthcare facilities, pharmaceutical and chemical sectors, where contamination prevention is an absolute priority.

They offer excellence, advanced functionality, and customized solutions, designed to meet even the most complex operational requirements. The design complies with strict sanitation standards, ensuring safety, hygiene, and ease of maintenance in every setting.

ERGONOMIC CHAIRS – Office

Ergonomic seating for modern offices designed to ensure comfort and durability: seat and backrest in beech plywood, selected for strength and aesthetic quality, upholstered in PU FLEX, soft to the touch and highly resistant to intensive use.

The height adjustment mechanism with gas piston ensures ease of use and adaptability for every user. Perfect for office environments where comfort, design, and well-being support a productive workday.

ERGONOMIC CHAIR – for 24/7 Production Departments

24-HOUR CHAIR for intensive use, designed to ensure superior comfort, functionality, and durability even under continuous operation. Inspired by the automotive world, it precisely adapts to the ergonomic needs of every user. The advanced tilting mechanism allows a 16° seat tilt and a backrest adjustable up to 22°, for a total range of 38°. Gear-driven technology, derived from automotive seats, ensures stability, reliability, and consistent performance over time. The robust steel frame allows integration of additional components, offering a high level of customization according to specific operational requirements.

LIQUID ABSORPTION & CONTAINMENT

This category includes products designed to absorb and contain hazardous liquids, from small operational spills to environmental emergencies. Essential for preventing risks associated with leaks, they are ideal for industrial production departments, maintenance activities, and environmental cleanup operations, including roads, soil, seas, lakes, rivers, and coastal areas. Their high absorption capacity ensures a fast and effective response, protecting workers' health and contributing to environmental safety.

- **Excellent Quality:**

Represents the best compromise between price and quality. Highly absorbent, pre-cut, and thermo-embossed. Additionally, it is tear-resistant and does not release absorbed liquids.

- **Superior Quality:**

Extremely durable, thanks to a scratch- and wear-resistant polyethylene micro-layer. Pre-cut and thermo-embossed, particularly suitable for placement on tool trolleys, near equipment and machinery. Ensures high absorption capacity without releasing liquids.

OIL-ONLY ABSORBENTS

OIL-ONLY PORTABLE KIT

UNIVERSAL PORTABLE KIT

CHEMICAL PORTABLE KIT

CLOTHS, PADS, ROLLS FOR SPILLS

We offer a wide range of solutions to meet every need, including rolls, cloths, sausages, pillows, spill kits, refill kits, and transporter kits.

Products are available in different qualities, each designed to ensure optimal performance according to specific operational requirements.

OIL-ONLY

This line is designed to quickly and effectively absorb oil and hydrocarbon spills, ensuring safe and timely intervention. It is not suitable for water absorption, focusing exclusively on oily substances and hydrocarbons.

PORTABLE KIT

Container with 4 wheels
Contains:
200 pads – 18 rolls
10 pillows – 15 disposal bags
with closure

—◆ ABSORBENT BARRIERS

These barriers are designed to combine durability with high absorbent capacity, ensuring fast and effective intervention. The polypropylene interior retains liquid even when fully saturated, keeping the barrier afloat. A nylon cord along the entire length increases strength and facilitates retrieval. Thanks to steel carabiners, the barriers can be linked together, creating modular and customizable solutions for the safe containment of outdoor spills.

—◆ SPILL CONTAINMENT BARRIERS

They provide an effective solution to prevent liquid spills from reaching drains, whether from minor machinery leaks or larger spills. Designed to be reusable and resistant to most chemicals, the barriers are also available in a drivable version, allowing safe passage for trolleys and trucks. Ideal for rough surfaces such as concrete and asphalt, they ensure optimal ground grip and reliable protection in any industrial setting.

—◆ MANHOLE COVER

Designed with a wear- and abrasion-resistant top layer, while the sticky bottom ensures an optimal seal. Made of polyurethane, it offers excellent resistance to oils and a wide range of chemicals.

Easy to shape, it is available in various sizes, including circular options to perfectly fit round manholes, providing protection and durability even in the most demanding environments.

UNIVERSAL CLOTHS / ABSORBENT ROLLS

Our technical absorbent cloths are available both in convenient rolls and in individual packs, offering maximum flexibility for use in any work environment. The compact rolls provide high absorption capacity, far surpassing rags, granular absorbents, and traditional wipes, and their small size makes storage and transport easy, optimizing space in workshops or warehouses.

Designed for demanding sectors such as metallurgy, metalworking, automotive, equipment manufacturing, and the paper industry, as well as workshops and garages, our cloths offer superior durability and performance, ensuring clean and efficient work even in the most challenging environments.

Choose the absorbent solution that combines practicality, durability, and performance, and take your productivity to the next level.

BLUE DOTTED ROLL

Hot-embossed, high absorbent capacity.

SIZE: 32x40 cm
LENGTH: 200 m
PERFORATIONS: 500

TNT CLOTH

Next-generation, high absorbent capacity.

SIZE: 32x43 cm
QUANTITY: 8 blisters of 160 cloths
1280 perforations

FOOD ABSORBENT CLOTH

Fast absorption of liquids produced by food, ensured by the perforation of the top layer.

SIZE: 45x60 cm
QUANTITY: 60 cloths

NEW LINE OF ABSORBENT CLOTHS AND ROLLS

Our complete range of technical cloths and rolls is designed to deliver high performance in every operational context, from light to heavy-duty tasks. Each product offers excellent absorption capacity, tear resistance, and reliability, even in the most demanding applications.

Versatile and dependable, our cloths and rolls are ideal for industrial, artisanal, and professional sectors, available in various sizes and materials to meet every cleaning, maintenance, and processing need.

A practical and efficient solution for those seeking optimal results while reducing waste and intervention time, without compromising on quality and durability.

TECHNICAL CLOTHS
Heavy-Duty

Durable and reusable, suitable for cleaning tough surfaces, oils, and lubricants. Recommended for industry, automotive, workshops, and maintenance.

SIZE: 30x42 cm
QUANTITY: 160 cloths

TECHNICAL CLOTHS
Medium-Duty

Effective in absorbing water and oil. Recommended for compressor leaks, cleaning belts and rollers, removing lubricants on cables, adhesives, and oily residues, even in hard-to-reach areas.

SIZE: 30x42 cm
QUANTITY: 200 cloths

TECHNICAL CLOTHS
Light-Duty

Soft and reusable, effectively absorb water and oil. Perfect for medium cleaning tasks, oils, lubricants, and delicate surfaces; more durable than paper. Recommended for general cleaning.

SIZE: 30x42 cm
QUANTITY: 176 cloths

FABRIC ABSORBENT CLOTHS

Replaces rags and wipes. The lint-free structure ensures uniform and effective cleaning, ideal for maintenance and professional cleaning. Excellent performance with oils, lubricants, solvents, and water.

SIZE: 30x50 cm
QUANTITY: 150 cloths

ABSORBENT ROLLS

Professional high-capacity absorbent, lint-free and ideal for absorbing solvents, oils, and water, suitable for technical applications in the industrial, food, pharmaceutical, automotive, aviation, and electronics sectors.

SIZE: 30x40 cm
QUANTITY: 2 rolls
PERFORATIONS: 560

DEGREASING WIPES

Ideal for water and oil. Perfect for compressor leaks, cleaning belts, rollers, and lubricants on cables, as well as removing adhesives and oil in hard-to-reach areas.

SIZE: 22x20 cm
QUANTITY: 8 blisters
TOTAL WIPES: 640

CONTAINMENT SHEETS

Our containment sheets are designed to protect personnel and equipment from overhead leaks and spills, ensuring safety and order in any work environment. Equipped with an integrated drainage tube, they channel liquids in a controlled manner, preventing contamination and damage. The range is available in various sizes and colors and includes a magnetic version, enhancing versatility and simplifying installation on metal surfaces. A practical and reliable solution for those seeking protection, efficiency, and ease of use in any industrial setting.

PIPE LEAK DIVERSION SHEETS

Our diversion sheets are designed to prevent slips, falls, and damage to machinery, equipment, and goods by quickly channeling leaks and condensation from pipes, keeping the work environment safe and clean. Available in vertical, horizontal, and inclined versions, they provide maximum flexibility, perfectly adapting to the specific layout of pipes in the facility. A reliable solution for those seeking protection, efficiency, and practicality, reducing risks and operational interruptions.

FAST RESPONSE DIVERSION SHEET KIT

Our containment sheets are designed to protect personnel and equipment from overhead leaks, safely channeling liquids through the integrated drainage tube.

Installation is quick and secure: the 4 heavy-duty securing rings prevent tears and ensure stability even under the most demanding conditions. Made of durable vinyl, the sheets provide high protection against punctures, UV rays, and mold, ensuring long-lasting performance and reliability. For greater versatility, they are available with straps or magnetic clips, and in various sizes and colors to perfectly suit your operational needs. A practical and durable solution for fast response to spills and leaks, keeping your work environment safe and efficient.

The kit includes:

- 1 diversion sheet for leaks
- 4 adjustable suspension straps
- 1 flexible drainage tube
- 1 quick connector
- 5 water absorbent pads
- 1 transparent drawstring bag

MAGNETIC LEAK DIVERSION SHEET – ROOFS

The containment sheet is designed to protect operators and equipment from overhead leaks by diverting and draining excess liquids through the included drainage tube.

With a flow capacity of 12.6 L/min, it ensures effective and continuous drainage during operations. Equipped with reinforced securing rings, the sheet guarantees quick and secure installation, preventing tears and damage even in heavy-duty applications.

The non-permeable, vinyl-coated material provides superior resistance to punctures, UV rays, and mold, ensuring long-lasting durability. Thanks to the sewn-in magnets, installation on metal surfaces is simple and immediate, allowing fast and flexible use in any industrial setting.

HIGH-FLOW ROOF LEAK DIVERSION SHEET

The high-flow diversion sheet is designed for effective drainage of roof leaks, allowing discharge of up to 38 liters per minute through the integrated flat tube, without the need for additional supports.

Made of non-permeable, vinyl-coated material, the sheet provides excellent strength and durability, resisting punctures, UV rays, and mold. A reliable solution that ensures long operational life even under demanding conditions.

ROOF LEAK DIVERSION SHEET WITH SAFETY MESSAGE

The high-visibility yellow diversion sheet is designed with two prominent messages on both sides, immediately drawing attention to the importance of safety.

Ideal for quick response during emergencies, it reduces downtime caused by roof leaks and provides effective long-term prevention in areas prone to infiltration.

— ABSORBENT GRANULES FOR OILS AND HYDROCARBONS – ON LAND OR WATER

ECOUNI10100

High-quality, eco-friendly mineral absorbent made 100% from recycled construction materials, carefully crushed, filtered, and decontaminated. Completely non-flammable, it ensures maximum safety even in contact with heat sources; in the event of accidental combustion, it does not release harmful gases. During absorption, ECOUNI10100 forms compact clumps that facilitate removal and optimize efficiency. For even better performance, it is recommended to use in combination with the Decodry Kit. Fully biologically inert and free of harmful additives, it is non-toxic and suitable for absorbing any type of liquid, whether oily or aqueous.

ABSORBENT DM2801

DM2801 is a fast-absorbing mineral powder, ideal for use in industrial environments where immediate and safe management of any type of liquid is required. During absorption, the product changes color and texture, forming small compact clumps that facilitate removal and leave surfaces clean, dry, and non-slip. Naturally derived and environmentally safe, DM2801 is free of chemical additives and free crystalline silica, ensuring maximum safety for operators and the work environment. Non-flammable, it is also the ideal choice for absorbing flammable and combustible liquids, without risks of degradation or ecotoxicity.

GREENSORB

The Absorbent Granules are the ideal solution for removing oils and hydrocarbons from soil and water surfaces. Supplied in 6 kg bags, they provide a practical, immediate, and high-performance response. Completely free of aggressive chemical ingredients, they act in a clean and controlled manner, without producing sludge or solidifying. Its formulation preserves the surrounding environment, ensuring effective and sustainable action in any operational condition.

59

— NEUTRALIZER FOR ACID SOLUTIONS

DM-NEU02 is a mineral neutralizer specifically designed for neutralizing acidic solutions found in lead-acid batteries, in compliance with Legislative Decree No. 20 of January 24, 2011. Its high-performance formulation requires 280 g of product per liter of water to fully neutralize an acidic solution with a density of 1.26 g/cm³, ensuring a fast, safe, and controlled action. Certified by the University of Parma, DM-NEU02 offers a shelf life of up to 8 years, outperforming equivalent solutions on the market in terms of stability, effectiveness, and long-term reliability.

— DECODRY CONTAINER

The 50-liter wheeled container is the ideal solution for storing and handling absorbent materials, designed to ensure practicality and organization in the workplace. Equipped with a scoop, shovel, broom, and sieve, it features an airtight lid to withstand outdoor use and protect the materials inside. A dedicated space and strap allow convenient storage of a paper roll, always within reach. The integrated sieve allows recovery of saturated clumps, letting reusable powder fall back into the container, optimizing product usage up to 100%. Perfect when used with ECOUNI, it ensures efficient and sustainable management of consumable materials in industrial environments.

BINS AND CONTAINERS

The storage tanks are made of 100% recyclable polyethylene, ideal for drums and small tanks, and feature a removable black grid that facilitates access and maintenance.

Thanks to their high UV resistance, these containers ensure durability and reliability even in outdoor environments.

Their design prevents liquid spillage onto the floor, reducing the risk of contamination and workplace accidents.

Compatible with most chemical liquids, the tanks are available in various sizes, all with removable grids for easy access to the internal tray and quick removal of spills or drips.

Compliant with current regulations on the storage and management of hazardous substances, they provide a safe, versatile, and sustainable solution for any industrial environment.

Containment tanks of any size to meet every need.

These products help you comply with regulations regarding the storage of liquids and hydrocarbons.

SOLUTIONS FOR LITHIUM BATTERIES

SOLUTIONS FOR LITHIUM-ION BATTERIES

Lithium-ion batteries have revolutionized the industrial sector thanks to their high performance and great versatility. However, they also involve significant risks that cannot be underestimated.

To fully harness this technology safely, it is essential to implement proper protection systems. Today, indispensable in numerous devices and industrial applications, these batteries can be subject to thermal runaway, a hazardous event that can cause:

Sudden fires with extremely high temperatures;

Explosions due to internal pressure build-up;

Emission of toxic gases, harmful to both people and the environment.

In the workplace, such incidents can have serious consequences for safety and operational continuity.

- Why choose our solutions?

KIWA Certification for fire protection of lithium-ion batteries, in compliance with the strictest safety and quality standards.

Compliance with VDMA 24994 guidelines, which define requirements for fireproof storage cabinets for portable batteries up to 25 kg. An important technical reference while awaiting official European regulations.

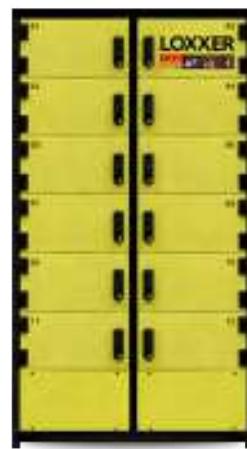

Adherence to PGS 37-2 directives, which establish precise criteria for loading and storage based on battery weight, aimed at preventing fires and avoiding the formation of toxic substances in case of an emergency.

DMR-LOXK2000VDMA

DMR-LOKK1100

DMR-LOX12

FIRE SAFETY KIT

Our Ultra and Prime fire blankets offer advanced protection against fires of varying intensity.

Made from high-quality flame-retardant materials, they provide excellent heat resistance and rapid extinguishing capability. Both ensure safety, reliability, and long-lasting performance, representing complementary solutions for all fire prevention and protection needs.

—◆ IMMERSION CONTAINERS

Designed to ensure the complete submersion of vehicles or components on fire, our container guarantees rapid and effective battery cooling, eliminating the risk of re-ignition and providing maximum safety for operators and the surrounding environment.

Fully customizable, it adapts to the specific requirements of each project, delivering precise, reliable, and tailor-made solutions for every critical situation.

—◆ CONTAINER CUSTOM

For large-scale projects, we offer fully customized walk-in containers and shelving systems tailored to your operational needs, including dimensions, layout, functionality, and finishes. Ideal for clients seeking a scalable or highly specialized fire-safe storage and charging solution.

—◆ STORAGE CONTAINERS

Storage containers designed exclusively to store and protect materials, products, or equipment.

Two-Door Containers for Storage / Storage & Charging

Six-Door Shelving Containers for Storage / Storage & Charging

Note: The six-door containers offer an advantage over standard two-door models, thanks to an additional four doors on the long side. This design ensures more practical and safer access, making it easy and fast to handle large pallets and batteries, even with a forklift.

VDMA 24994 Certified

Our lithium battery solution has successfully passed the rigorous VDMA 24994 test, demonstrating the highest standards of safety and performance! The VDMA 24994 will serve as the foundation for a future European standard.

What is VDMA 24994?

The VDMA 24994 test is a German standard established by the DIN certification body. During the test, lithium batteries are deliberately pushed into thermal runaway to evaluate the safety and performance of the cabinet.

VISUAL INSPECTION & LOGISTICS SAFETY

Our complete range of logistics accessories is designed to enhance safety and efficiency both inside facilities and outdoors, in yards and truck loading/unloading areas. It includes solutions such as Collision Sentry, which detects forklift movement in blind spots to protect pedestrians and operators, and Dockbumper, a protective buffer for loading bays. The range also features flexible posts, mirrors, cable pass-throughs, Ice Alert systems, speed bumps, and other solutions designed to make operations safer, faster, and more organized.

INDUSTRIAL AND PROFESSIONAL MIRRORS

Our industrial and professional mirrors are designed to meet the needs of industrial environments, supermarkets, airports, service stations, and high-traffic areas. They provide multiple functions, enhancing road and workplace safety, improving visibility in critical areas, and serving as surveillance tools to prevent theft and monitor spaces in busy locations.

TRAFFIC MIRRORS

Our parabolic traffic mirrors are designed to enhance road safety, making intersections and blind spots safer. Available in rectangular or round shapes, they feature a white and red reflective strip, ensuring optimal visibility even in low-light conditions.

SURVEILLANCE MIRRORS

Our parabolic surveillance mirrors are designed to prevent theft and monitor spaces in supermarkets, airports, service stations, shops, and other high-traffic areas. They provide a clear and wide view, ensuring effective oversight of environments and enhancing overall safety.

DOME SURVEILLANCE MIRRORS

Our spherical parabolic dome mirrors provide multiple viewing angles—90°, 180°, and 360°—ensuring optimal space monitoring. Ideal for logistics environments, retail areas, warehouses, industrial sites, and commercial spaces, they enhance safety and visibility, help prevent accidents, and optimize surveillance.

INDUSTRIAL MIRRORS

Our industrial parabolic mirrors are designed to enhance safety in workplaces and industrial areas. Available in rectangular or round shapes, they feature a yellow and black reflective strip, ensuring high visibility and helping to prevent accidents.

UNIVERSAL MIRRORS

Our universal parabolic mirrors are designed to enhance safety across various settings, from industrial environments to public spaces. Available in rectangular or round shapes, they comply with EU Directive 92/58, ensuring high standards of quality and safety.

ICE ALERT

The patented Ice Alert device is designed to enhance safety by providing a visual warning when ambient temperatures drop and there is a risk of ice formation. Used in industrial, commercial, and military settings, it can be installed in parking lots, companies, train stations, production plants, airports, ports, and roads. Ice Alert helps prevent slips and injuries, ensuring a safer working environment.

Made from polymeric plastic and equipped with a bimetallic strip, the device is fully recyclable.

Each Ice Alert device is set at ambient temperature and calibrated to activate at 3°C. Initially, the display is silver-gray, but when the temperature drops to 3°C, it begins to change to fluorescent blue. Upon reaching 0°C, the display turns completely blue.

COLLISION SENTRY CORNER PRO

Collision Sentry is the ideal solution for protecting blind corners in logistics and industrial environments, where forklifts and pedestrians often intersect. Designed to enhance workplace safety, this anti-collision alert system can be easily mounted on a shelf corner or wall. Collision Sentry emits a warning when it detects movement along both sides of the corner, helping to prevent collisions and ensure a safer working environment.

65

Collision Sentry detects movement on both sides of a corner and emits visual and audible alerts to warn of potential collisions. Easy to install without tools using the included mounting components, it operates on D-cell alkaline batteries with a 2–3 year lifespan, requiring no wiring. Equipped with infrared PIR sensors and a durable lens, it delivers a strong, adjustable audio signal, making it suitable even for noisy environments.

COLLISION SENTRY MULTIZONE

Collision Sentry Multizone is an innovative device designed to enhance safety in high-traffic areas such as warehouses, logistics centers, and industrial zones.

Using advanced detection technology, Collision Sentry Multizone simultaneously monitors multiple blind corners and adjacent zones, providing timely alerts to operators and pedestrians about potential collisions between machinery and people. Compact and easy to install, the system emits visual and audible signals, activating only when a real hazard is detected to minimize false alarms.

Ideal for areas with forklifts, industrial vehicles, and narrow passages, it helps create a safer and more efficient working environment.

Choose Collision Sentry Multizone to prevent accidents and ensure maximum operational safety!

CABLE GUIDE

The cable guide is designed with a low-profile, anti-trip structure, ensuring safety in the workplace. Yellow side stripes provide high visibility, and installation requires no floor fastenings, making the product practical, versatile, and ready to use immediately.

SPEED BUMP

Speed bumps encourage careful driving by slowing vehicles in urban areas or on specific road conditions. The use of speed bumps is widespread internationally and regulated by specific standards, ensuring that their design and installation meet technical safety and performance requirements.

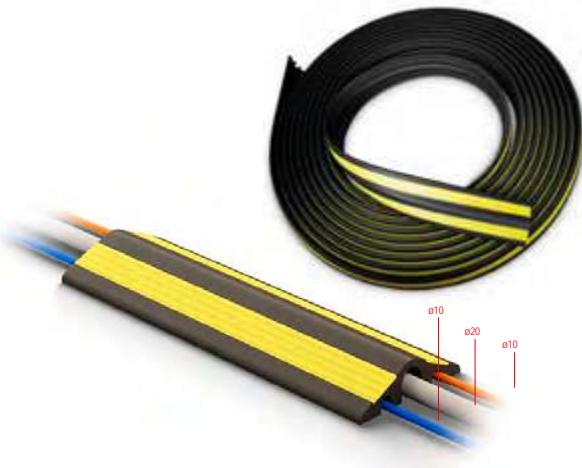

RAISED PEDESTRIAN CROSSING

Raised pedestrian crossings provide a practical solution to protect children, the elderly, pedestrians, and cyclists by encouraging drivers to slow down near pedestrian areas. This system ensures safety without disrupting traffic flow, minimizing inconvenience for those traveling within the speed limits.

► SOFT CABLE COVER

A floor-mounted soft protection system ideal for safeguarding cables with diameters of Ø10 – Ø20 – Ø10 mm. Made from recycled material, it features a low-profile, anti-trip design. The yellow side stripes provide high visibility in the workplace, and no floor fastenings are required.

► SAFETY DELIMITERS

Safety delimiters are the ideal solution for organizing and separating parking spaces, truck bays, and other maneuvering areas, ensuring order and protection. Designed to effectively mark spaces, they protect vehicles from collisions with walls or obstacles and prevent entry into restricted zones.

Made from highly weather-resistant materials, they guarantee long-lasting performance even in outdoor environments and harsh climatic conditions. Each delimiter features a dedicated groove for adding text, logos, or reflective films, enhancing visibility and allowing customization to meet specific requirements.

► WHEEL STOP

Made by hot molding from a PVC-based recycled polymer matrix, with added plasticizer for enhanced durability.

- Equipped with 2 mounting holes (screws and anchors not included).
- Ideal for parking lots and garages.
- Easy to install.

► TRAILER STAND

This trailer support acts as a deterrent against tipping during loading. It features a heavy-duty steel structure with a base measuring 470 x 425 mm, paired with a large trailer contact plate of 760 x 120 mm. The height is adjustable from 1020 to 1340 mm.

The system includes pneumatic self-leveling and an ergonomic design, complete with handles and features that make trailer positioning easy. It is equipped with solid rubber wheels with a diameter of 400 mm.

FORKLIFT FORK CAP

Designed to prevent impacts and damage to products during lifting, loading, and handling with forklift forks. Quick, tool-free installation: easy to attach and remove without screws, bolts, or adhesives. High-visibility yellow rubber construction, resistant to oils and chemicals, ensuring consistent performance even in demanding environments. Reinforced steel inner structure provides strength, stability, and long-lasting durability.

POST AND CHAIN SET

Practical and ready-to-use solution for marking temporary areas. The kit includes 6 high-strength polyethylene posts and a 10-meter chain to quickly create a well-visible and organized barrier. The black bases provide stability without permanent fixings, allowing easy relocation and reuse. Available in yellow/black and white/red combinations for maximum visibility, it is ideal for construction sites, parking lots, events, or temporary work areas. Quick to assemble and disassemble, with a lightweight yet durable structure, this set offers a versatile and professional solution for all temporary signage needs.

POLYURETHANE FLEXIBLE POST

Ideal for dynamic environments, this post bends upon impact and automatically returns to its original position, ensuring long-lasting durability and maximum safety. Available in white-red and yellow-black reflective versions for constant visibility, even in challenging conditions.

EXTENDABLE BARRIER WITH WHEELS

Perfect for warehouses, shops, workshops, and other operational environments, it takes up minimal space and folds easily. The sturdy structure ensures high stability, while the wheels can be locked in place for safe use. Fully extended, the barrier can be easily connected to additional units, allowing modular adaptation to different operational needs.

WORKPLACE HYGIENE & CLEANING

Our range includes in-house manufactured containers, bins, recycling stations, and cigarette disposal units, designed for durability, functionality, and ease of use. Reliable solutions for every operational environment, from warehouses to public areas.

DMR CARES ABOUT THE ENVIRONMENT!

MODULAR RECYCLING CONTAINERS

Differenzio is a station composed of seven modular polypropylene containers, easily assembled in seconds without tools. The hexagonal shape of the containers allows the station to be optimally configured for any available space, while the distinct colors of the modules enhance visibility and make it easy to identify the types of waste to be disposed of.

This product can be customized by waste type and color according to the regulations of your local municipality.

MODULAR RECYCLING CONTAINERS – URBAN USE

Designed for urban use, these modular containers provide a robust, versatile, and durable solution for waste separation. Made from AISI 304 stainless steel (AISI 316 available on request) or powder-coated galvanized sheet, they ensure long-lasting strength and capacity.

Each unit includes an internal bag holder for easy use and quick maintenance. Upon request, the containers can be customized with different colors, allowing them to integrate seamlessly into urban environments.

MINI SMOKE POINT – KEEPING THE ENVIRONMENT CLEAN

Designed for the efficient collection of cigarette butts, this container is the ideal solution for public spaces, businesses, and industries looking to keep smoking areas and entrances clean. Its functional and practical design makes collection easy and helps maintain a tidier environment, supporting urban cleanliness and environmental responsibility.

CUSTOMIZED CLEANING STATIONS

Made from 10 mm thick Forex, this panel serves as a cleaning station, providing a complete solution for the collection and organization of hygiene and cleaning products. It is ideal for public spaces, offices, businesses, and high-traffic areas.

Available in various sizes, it ensures high visual quality and long-lasting durability. Each panel can be customized with the client's requested graphics and comes with 5 hooks for easy and secure mounting.
